The Beet for Every Garden

MILLS EXTRA EARLY BLOOD TURNIP BEET

This is a selected strain and I claim it is the finest main crop all-purpose beet in cultivation. It is uniform in size, handsome in appearance and attracts attention everywhere. It is very early the color a dark rich red and the quality is superb, being sweet, tender and fine grained. Splendid for canning and its keeping qualities are excellent. Ready for use in 45 to 50 days from seed.

Pkt. (about 250 seeds) 5c; 3 pkts. 12c; 6 pkts. 20c; oz. 15c.
I have a great treat in store for my customers this year in the way of BEAUTIFUL GLADIOLI, so easily grown in any garden. I have grown nearly one hundred named varieties, many being novelties and high priced sorts and have put them all into a mixture, which I call "RAINBOW COLLECTION of GLADIOLI." The many gorgeous colors with such wonderful tints, shades and various markings are sure to surprise and delight all who grow them. On this page I can only show a few of the many varieties in this mixture which will give some idea of what this wonderful collection will produce. I do not think such gorgeous Gladiolus flowers can be had from any other mixture, and my prices are remarkably low.

If you want the greatest array of Gladiolus flowers you ever had, plant a liberal supply of "RAINBOW COLLECTION" this year (100 or more bulbs if you possibly can). Plant at intervals from as early in Spring as ground can be worked until July and you will have a continual supply of beautiful flowers in about 60 days after planting until frost in Fall.

My BULBS vary in size according to different varieties in the mixture, from three-fourths inch and up to about two inches in diameter. I offer only Rainbow Collection—no separate colors.

PRICES: 12 Bulbs 40¢; 25 for 75¢; 50 for $1.30; 100 for $2.50; 500 for $12.00.

Delivered by Parcel Post to any address in the United States.

Instructions for planting and culture of Gladiolus will be sent with every order.

RAINBOW COLLECTION will produce more flowers for the money invested in bulbs than any other flowering bulb.

Highest Quality---Lowest Prices

Mills Seeds are raised with the greatest possible care and I do not think these are any better seeds produced. They are tested for Vitality and Purity before being sent out in order to make them safe for planting. Every variety I offer is described as accurately as possible, and time of maturity given as nearly correct as I can give, varying somewhat in different sections of the United States, but based on my thirty-eight years experience. Nearly all illustrations in this book have been made from actual photographs.

My prices are right, taking into consideration the saving of expenses I make by issuing a small Seed Book, and also by doing business on my own farm and in my own buildings at Rose Hill, N. Y., where mail is received and dispatched twice daily direct to Railway Mail Trains, as compared with many City Seedsmen who are under heavy expenses for very large expensive catalogues, rents and other expenses I am able to save, giving the benefit to my customers.

Read My Double Guarantee

First—I guarantee the Vitality and Purity of my seeds to the full extent of the purchase price. Even with the highest quality seeds success in gardening and farming depends largely upon soil, cultivation and weather conditions. It is therefore agreed that in no case shall I be liable for more than the amount actually paid for the seeds or bulbs.

Second—I guarantee the safe arrival of all seeds and bulbs in good condition and should anything be lost on the way I will refund when proof is furnished of non-arrival. This is the Double Guarantee that protects all who purchase Mills Seeds and Bulbs. My Motto is—"Never send out any seeds or bulbs which I do not know that I myself would be thoroughly satisfied with, were the position of buyer and seller reversed."

Seeds and Bulbs Delivered by Parcel Post

All Seeds offered in this Seed Book by the packet, ounce, pound, or fraction of a pound, or any quantity of bulbs, will be delivered to your door at the prices given, without postpaid. Packages weighing up to 70 pounds can be sent into the 1st, 2nd, and 3rd zones, and 40 pounds is the weight limit of packages to the 4th, 5th, 6th, 7th, and 8th zones.

Send your order for Vegetable and Flower Seeds to Mills Seed House, Rose Hill, N. Y., and get the best Seeds that money can buy, and remember you will receive Free for Trial my Gorgeous Color Display shown and described on page 2 of this book if your order amounts to $1.00 or more.

How to Order

Please sign your name and full address on every order or letter you send me, and write very plainly and use my Order Sheet when ordering, if possible.

I have been doing a strictly cash-with-order business for thirty-eight years and you run no risk in sending money with order. I refer you to my hundreds of thousands of customers all over the United States.

Remit at your risk by Money Order, Draft or Check. Use Registered Letter if you send Cash or Stamps.

Customers outside the United States must add 20% to my catalog prices for postage and packing required. No foreign coin or postage stamps accepted.

F. B. MILLS, SEED GROWER Rose Hill, N. Y.

Vegetable Peaches

The Vegetable Peach is a fruit you should grow in your garden this year. It grows about the size of a large peach, of a bright orange color, somewhat russety. It is produced on vines smaller than a muskmelon vine, and requires the same cultivation. It is easily grown in most any section of the country, and is a great producer. The fruit is very attractive, flesh fine, and is a good keeper. It is fine for pies, sauce, preserves, or sweet pickles. A glass jar of these cut in halves and cooked in syrup presents a beautiful and tempting appearance. Recipes for cooking, canning and preserving on every page.

Pkt. (about 100 seeds), 12c; 5 pkts., 50c; 10 pkts., 80c; 50 pkts., 25c.
Exquisite Oriole Diearn Tolar Buttercup Canary Bird Scarlet Flame

I believe this is the most wonderful color collection of flowers grown from seed ever sent out, and will produce more flowers with less care and attention than any flower seed my customers ever planted.

READ THIS OFFER. Every customer ordering $1.00 worth of anything from this Seed Book will receive, FREE, one large packet (about 100 seeds) of the above GORGEOUS COLOR DISPLAY OF ZINNIAS. If your purchase is $2.00 you will receive two packets and so on; one packet for every $1.00 purchase.

F. B. MILLS, Grower Rose Hill, N. Y.
Bush Beans

Notice
I offer Beans by the packet, half pound and pound, instead of by the pint and quart.
One-half pound equals about ½ pint.
One pound equals about 1 pint.
Two pounds equals about 1 quart.
Fifteen pounds equals 1 peck.
Sixty pounds equals 1 bushel.

Giant Stringless Green Pod
This is a very popular green pod Bean and one of the best. The plants are of strong growth, very productive, pods about 5 inches long, light green, slightly curved, very meaty and absolutely stringless. No better variety for the home garden on account of its fine flavor and brittleness. Ready for picking in about 45 days.
Pkt. (about 100 seeds), 5c; 3 pkts., 12c; ½ lb., 20c; 1 lb., 36c; 3 lbs., $1.00, postpaid.

Bountiful Bush (Green Pod)
Remarkably Prolific and Continuous Bearers.
This Bean is a great favorite wherever known. Plant is of thrifty growth and practically rust and mildew proof. It is extremely early, very prolific, hardy, and bears continuously for several weeks. It is the first to give pods fit to pick in the spring and about the last to yield edible pods in the fall. The rich, green pods which are of large size, thick, broad, and extra long, uniform in shape, solid and meaty, are absolutely stringless. Ready for picking in about 45 days.
Pkt. (about 100 seeds), 5c; 3 pkts., 12c; ½ lb., 20c; 1 lb., 36c; 3 lbs., $1.00, postpaid.

Rainbow Collection of Gladioli
Plant a liberal supply of my Rainbow Collection of Gladioli, 100 or more bulbs, if you possibly can, and you will have a wonderful display of gorgeous flowers. See inside front cover for color, description, and prices.

Sure Crop Wax (Yellow Pod)
This is a very prolific cropper of high quality. The habit of the plant is sturdy and upright in growth, branching freely, carrying a heavy crop of handsome, rich yellow pods, averaging 6 to 7 inches in length. The pods are very meaty and sweet and perfectly stringless at all times, making it especially valuable for home garden planting. It is ready to pick in about 45 days and you should grow it.
Pkt. (about 100 seeds), 5c; 3 pkts., 12c; ½ lb., 20c; 1 lb., 36c; 3 lbs., $1.00 postpaid.

Mills Rust-Proof Wax (Yellow Pod)
I consider this one of the best Rust Proof Wax Beans in cultivation, and always produces heavy crops of large attractive golden yellow pods. These pods are very thick and flabby, tender, brittle, and entirely stringless at all stages until maturity. As its name indicates it is practically Rust Proof and ready to pick in about 45 days.
Pkt. (about 100 seeds), 5c; 3 pkts., 12c; ½ lb., 20c; 1 lb., 36c; 3 lbs., $1.00 postpaid.

Bush Limas
Remember the Lima Bean is a native of warm climates and requires warm weather to grow to perfection. They are sensitive to cold and moist weather and cannot be planted until after the ordinary snap beans.

Early Dwarf Bush
This variety is smaller than other but is the earliest Bush Lima Bean, while the flavor is equal to the best large Limas. The green Beans are plump, tender, sweet and juicy in flavor when cooked. Green beans can be had in abundance from July until frost by planting this sort. Ready to use in 50 to 60 days.
Pkt. (over 100 seeds), 5c; 3 pkts., 12c; ½ lb., 20c; 1 lb., 36c; 3 lbs., $1.00.

Mammoth Bush
This is one of the best Mammoth Bush Limas. Plants grow 18 to 24 inches high in bush form and produce Beans as large as Pinto Limas, and are ready to use nearly two weeks earlier. The Beans are thick, of excellent quality and of the true buttery Lima flavor. It is an enormous_yielder and every garden should have some of these Limas. Ready in 65 to 70 days.
Pkt. (about 30 large seeds), 5c; 3 pkts., 15c; ½ lb., 30c; 1 lb., 55c; 2 lbs., $1.00, postpaid.

Mills Rust-Proof Wax Beans—Yellow Pod.
POLE BEANS
Golden Cluster Wax

The grandest Yellow Podded Pole Bean in cultivation. As shown by the photograph it produces great quantities of stringless golden-colored waxy pods 7 to 9 inches long, pods being produced in clusters of from 4 to 6 all over the vine. The pods are thick, fleshy, and of delicate flavor, and if kept picked off and not permitted to ripen the vines will bear continuously until late in fall. Ready in about 75 days.

Pods, (about 60 seeds), 6c; 3 pods, 15c; ½ lb., 25c; 1 lb., 40c; 10 lbs., $1.25 postpaid.

Giant Podded Lima

This is the very earliest Pole Lima and also extremely productive. It is a strong grower, clinging well to the pole and is a sure cropper. The pods hang from the foliage in large clusters and contain from 5 to 8, and sometimes even more big fat buttery Lima beans of the finest quality. It is extremely productive throughout the season. For a Pole Lima plant this one. Ready in about 90 days.

Pods, (about 30 large seeds), 6c; 3 pods, 15c; ½ lb., 25c; 1 lb., 40c; 3 lbs., $1.25 postpaid.

IMPROVED 1200 TO 1 BEAN

The I n a s e s c will climb an arbor or any support to a height of 20 to 30 feet, or it will run along on fences. Fruits grow from 3 to 4 feet in length and 4 to 6 inches in diameter. They are used in the same manner as Squashes and Egg Plants, being sliced and fried.

One of my customers, Mr. Elmer Will, sends me this photograph and writes as follows: "I enclose picture of myself and Giant Bean, the three weighing 40 pounds, grown from seeds you sent me."

You should try this Bean for it is both useful and ornamental. Matures in about 100 days. Growing instructions on every packet.

Pkt. (about 15 seeds), 10c; 3 pkts., 25c; 7 pkts., 50c.

New Guinea Gourd Bean

The vines will climb an arbor or any support to a height of 20 to 30 feet, or it will run along on fences. Fruits grow from 3 to 4 feet in length and 4 to 6 inches in diameter. They are used in the same manner as Squashes and Egg Plants, being sliced and fried.

One of my customers, Mr. Elmer Will, sends me this photograph and writes as follows: "I enclose picture of myself and Giant Bean, the three weighing 40 pounds, grown from seeds you sent me."

You should try this Bean for it is both useful and ornamental. Matures in about 100 days. Growing instructions on every packet.

Pkt. (about 15 seeds), 10c; 3 pkts., 25c; 7 pkts., 50c.

Plant 100 or More Gladiolus Bulbs This Year—See Inside Front Cover
Table Beets

Leaflet, "How to Grow Beets" free with order if asked for.

MILLS EXTRA EARLY BLOOD TURNIP.
(See Front Cover).
Pkt. (about 250 seeds), 5c; 3 pkts., 12c; 6 pkts., 25c; oz., 15c.

Early Pickling Blood Beet
This is one of the grandest of all Early Blood Turnip Beets. It is a small, round, uniform shaped variety. Color a glossy red and of exceptionally fine quality. The beets are smooth, with small tap root. It is especially popular as a family beet for pickling or for greens. It is good for early planting for Spring and Summer use, and can be stored in the cellar for Winter use, on account of its long keeping qualities. Ready for use in about 40 days.
Pkt. (about 250 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 12c; ½ lb., 20c.

Crosby's Egyptian
A very popular Extra Early Garden Beet, and a money maker for market gardeners. This Beet is handsome in form, good-sized, small tap, very small tap root, fine quality, dark deep red, and of quick, rapid growth.

Eclipse
This is an early Beet, round, uniform shape and of very fine quality. Color is a glossy red. Beets are smooth with very small tap root. A popular family beet and desirable for greens. Ready for use in 42 to 45 days.
Pkt. (about 250 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 12c; ½ lb., 20c.

Improved Long Red
The flesh is rich dark red, very sweet, crisp, and tender. Stands dry weather better than most sorts, and is good for Fall and Winter use. Roots 8 to 10 inches long when matured, requiring 60 to 70 days.
Pkt. (about 250 seeds), 3c; 3 pkts., 8c; 6 pkts., 15c; oz., 9c; ½ lb., 20c.

Mangels

Read Page Two

Mills Mammoth Prize Long Red Mangel

The most popular red mangel, sometimes called "Giant" or "Jumbo." Often grows from 24 to 30 inches in length, weighing from 50 to 90 lbs. This variety will yield more tons per acre than any other and is one of the best for stock feeding during Winter.
Pkt. (300 to 400 seeds), 4c; 3 pkts., 8c; oz., 15c; ½ lb., 25c; 1 lb., 65c; 5 lbs., $2.25, postpaid.

Golden Tankard Mangel
The most desirable yellow mangel, immense yielder, producing from 1,000 to 2,000 bushels per acre on good soil. Quality high and is greatly prized by farmers.
Pkt. (300 to 400 seeds), 4c; 3 pkts., 8c; oz., 15c; ½ lb., 25c; 1 lb., 65c; 5 lbs., $2.25, postpaid.

Giant Half Sugar Mangel
Considered by many more valuable for feeding purposes than the other Mangels. Yields nearly as much per acre, roots large, oval in form, with small top, flesh white.
Pkt. (about 400 seeds), 3c; 3 pkts., 8c; oz., 25c; ½ lb., 50c; 1 lb., 100c; 5 lbs., $2.25, postpaid.

Edmund's Extra Early Blood Turnip Beet

Market Gardeners' Beet

The root is deep red, dark red, very sweet, crisp and tender, better good at all stages of growth. It is a rapid grower, making a heavy root for autumn or winter use. Symmetrical in shape and handsome in appearance.
Pkt. (about 250 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 12c; ½ lb., 20c.

Swiss Chard or Spinach Beet

The leaves of Swiss Chard are used for greens, the same as Spinach or Beet tops. Are equal in quality and more easy to prepare than Spinach. Can be used all Summer and nothing in the garden requires less care.
Pkt. (300 to 400 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 12c; ½ lb., 20c.

Mixed Beet Seed
Produces a great variety of all the different Beets from the earliest to the late sorts, and will supply you with beets throughout the season.
Pkt. (about 250 seeds), 3c; 3 pkts., 8c; oz., 15c; ½ lb., 20c; 1 lb., 35c.
Cabbage

My list is made up of the very best Early, Medium, and Late Crop varieties. Seed is all carefully tested.

In the Northern and Central States for early use sow seeds of the early kinds in a box in the house or a hatch in February or March. Transplant to the open ground in April or May, or sow a bed outside as soon as soil can be worked. For second early or late Cabbage sow in April or May and transplant in June or July.

All-Head Early
This is the earliest of the large flat head sorts. It is remarkably solid and is really an all-the-year-round cabbage, being equally good for winter. It is usually grown for summer and fall use, yet if sown early in July it will form solid heads. Ready for market in about 90 days.

Pkt. (about 500 seeds), $1; 3 pkts., 12; 6 pkts., 20; oz., 50; lb., 85c.

Early Winningstadt
One of the best early sorts for general use, and an old favorite everywhere. It is very hardy, which permits early planting. Heads are pointed, very hard and of uniform shape. A good keeper winter and summer. Ready for market in about 90 days.

Pkt. (about 500 seeds), $1; 3 pkts., 12; 6 pkts., 20; oz., 50; lb., 85c.

Early Jersey Wakefield
This is a very popular sort and needs no description. The heads are usually hard and solid, generally pointed at the ends with flat outer leaves. I offer a very fine strain which matures in about 90 days from the sowing of the seed.

Pkt. (about 500 seeds), $1; 3 pkts., 12; 6 pkts., 20; oz., 50; lb., 85c.

Danish Ballhead
This is the hardest of all Cabbage, being especially desirable for shipping. The hardness, solidity, and weight of heads is truly wonderful and heads of equal size will weigh quite a little more than other varieties. A grand variety for storing, if market prices are not satisfactory in the fall. It has few outer leaves which admits of close planting. Heads are medium sized and specially recommended for growing for market purposes in the Northern states. Matures its crop in about 120 days.

Pkt. (about 500 seeds), 5c; 3 pkts., 12; 6 pkts., 20; oz., 35c; ½ lb., 85c.

Chinese Cabbage
A wonderful new salad plant, easy to grow. Resembles Ceylon, yet is something like Cos Lettuce. Firm, crisp, easily blanched, excellent when cooked as a vegetable or as a salad.

Pkt. (about 500 seeds), 5c; 3 pkts., 12; 6 pkts., 20; oz., 35c; ½ lb., 85c.

Copenhagen Market
A splendid early Cabbage from Denmark, producing a large globe-shaped head, averaging about 8 lbs. in weight with few loose leaves, permitting close planting. It is a vigorous grower and an excellent keeper. Does well in the South. Ready for market in about 80 days.

Pkt. (about 500 seeds), 5c; 3 pkts., 12; 6 pkts., 20; oz., 35c; ½ lb., $1.
Giant Solid Head

This is a grand Cabbage, and all who have grown it are more than pleased. It is a late variety and the heads are as solid and hard as Damash Ballhead. The heads are round as shown by the photograph and they are not liable to crack. It is a very vigorous grower and will stand drought to a remarkable degree and the heads will average from 8 to 12 lbs. through a whole crop with proper cultivation. It is highly recommended for keeping qualities and is an excellent sort to grow for storing in winter for spring market. Ready in about 120 days.

Pkt. (about 500 seeds), 3c; 3 pkts., 12c; 6 pkts., 25c; oz., 30c; ½ lb., $1.00.

Surehead Cabbage

A well known variety and one of the best late Cabbages. Heads are very uniform in shape, of the Flat Dutch type, weighing from 10 to 20 lbs. under favorable conditions. Few other varieties can approach it in fine quality and uniform reliability in forming solid heads of good size. It is all head and always sure to head even where other varieties fail. It is one of the best keepers. Mature in about 110 days.

Pkt. (about 500 seeds), 5c; 3 pkts., 12c; 6 pkts., 25c; oz., 30c; ½ lb., $1.00.

Mammoth Rock Red Cabbage

This is the largest of the red Cabbage and a sure header. Heads round, very solid, weighing 8 to 12 lbs., and an attractive russet-red color extending to the center of the head. A very hardy variety, making it a valuable sort for the home garden, market or pickling. Ready for market in about 110 days.

Pkt. (500 to 1000 seeds), 5c; 3 pkts., 12c; 6 pkts., 25c; oz., 30c; ½ lb., $1.00.

Mills Earliest Flat Head

This is just the Cabbage for the home gardener growing fine solid good sized heads fit to use in 30 to 40 days from sowing of the seed. The deep flat heads are remarkably solid and uniform in shape and size. It is a beautiful head in appearance and in account of its rapid growth excels all others for ten- derness.

Pkt. (about 200 seeds), 5c; 3 pkts., 12c; 6 pkts., 25c; oz., 30c.

Mills Giant Late Flat Dutch Cabbage

Mills Giant Late Flat Dutch Cabbage

This is one of the greatest of the main crop Cabbage. Enormous heads, very firm, of the best keepers. It often produces heads from 3 to 4½ feet in circumference, which are grown on top very firm and solid, and a good keeper. The heads are firm-grained and it is considered the king of winter Cabbage. The absence of any large outer leaves permits more plants to the acre than most large, late varieties, and this feature makes it nice for home gardens, and it is also sure to produce more per acre when grown for market. It is probably the largest heading of all Cabbages but requires strong soil for the best results. Ready for market in 110 to 120 days.

Pkt. (about 500 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c; oz., 30c; ½ lb., $1.00.

World Beater

This is one of the greatest of the main crop varieties, and it is quite free from a tendency to bolt. It is an all round good late Cabbage and will mature in about 110 days.

Pkt. (about 500 seeds), 4c; 3 pkts., 12c; 6 pkts., 25c; oz., 30c; ½ lb., $1.00.

Every safeguard is used in growing, harvesting, and putting up for distribution Mills Seeds. The vitality and purity are guaranteed to the full extent of the purchase price, and no expense is spared to produce the best seeds that it is possible to grow. Of course if it is expected the customer will use care in planting for success in farming and gardening depends largely upon soil, cultivation, and weather conditions. Remember our interests are really mutual—your success is my success, and I want you to have the finest garden in your neighborhood by planting MULLS SEEDS.
Carrots

Mills Champion Yellow
Flesh dark rich reddish orange color, tender and sweet. A heavy cropper, maturing in about 75 days. Good for table use or for stock feeding. Pkt. (over 1500 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 25c; lb., 1.00.

Earliest Scarlet Forcing
The earliest of all Carrots and best for forcing, also suited for home garden for quick crop. Roots grow nearly round, 2 to 2½ inches in length, of rich orange red, ready to use in about 55 days. Pkt. (over 1500 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 25c; lb., 1.00.

Golden Beauty Carrots. A splendid table variety, growing from 5 to 7 inches long. The flesh is a beautiful rich orange color, tender and fine grained, free from hard core. It is of medium size, with small tops. A splendid keeper and ready for table in 60 to 65 days. Pkt. (over 1500 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 25c; lb., 1.00.

Mastodon
Suitéd for shallow soil but an enormous cropper. Roots large pure white, smooth, flesh rich and solid, but for stock feeding. Matures in about 90 days. Pkt. (over 1500 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 25c; lb., 1.00.

Black Beauty. Root for the Northern States, and it is the earliest variety that grows to good size suitable for market. It is jet black in color, shape is well shown in illustration, average weight 2 to 3 lbs. Ready for use in about 130 days. Pkt. (about 125 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 50c.

New York Improved Large Purple. A favorite for both market and private use, and a standard sort in the South. Fruit is large, skin rich purple, flesh white and of good flavor. A vigorous grower, being extremely productive, ready for table in about 140 days. Pkt. (about 125 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 50c.

Palmetto. Early, light green sort, remarkably tender and rich when cooked. Soak seed 24 hours in warm water before sowing. Pkt. (about 200 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 20c.

Egg Plants
Sow the seed in hotbed in March or April and set in the garden after danger of frost. They require rich soil.

Asparagus

BLACK BEAUTY. Root for the Northern States, and it is the earliest variety that grows to good size suitable for market. It is jet black in color, shape is well shown in illustration, average weight 2 to 3 lbs. Ready for use in about 130 days. Pkt. (about 125 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 50c.

New York Improved Large Purple. A favorite for both market and private use, and a standard sort in the South. Fruit is large, skin rich purple, flesh white and of good flavor. A vigorous grower, being extremely productive, ready for table in about 140 days. Pkt. (about 125 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 50c.

Palmetto. Early, light green sort, remarkably tender and rich when cooked. Soak seed 24 hours in warm water before sowing. Pkt. (about 200 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 20c.

Endive. Sow early in spring and the plants reach quality size in 60 to 65 days.

Green Curled. Leaves tender, green but blanch white. Pkt. (about 1500 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 25c.

Broad Leaved Batavian. Leaves large and broad. The tops for blanching. Pkt. (about 1500 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 25c.
Celery

**Dwarf Golden Heart**
Half dwarf sort, producing handsome stalks of a rich green color, blanching to a golden yellow, crisp, brittle, and of excellent flavor, and a good keeper. Matures in about 125 days.

- Pkt. (over 1500 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 30c.

---

**Giant White Solid**
This is a beautiful type, not only does the stem blanch but especially every inner leaf, making an attractive white celery. It is tender, brittle, and sweet flavored. Valuable for fall or early winter use. Pkt to eat in about 120 days.

- Pkt. (over 1500 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 30c.

---

**Giant Pascal**
One of the best sorts for winter use at home or for nearby market. It is too crisp for shipping. The stalks are remarkably large, crisp, and brittle, and has a sweet nutty flavor. Matures in 120 days.

- Pkt. (over 1500 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 30c.

---

**Golden Self-Blanching**
This variety is the standard for winter use. Plants of strong vigorous growth, very stocky habit, with solid, thick and very broad leafstalks. It is a rich dark green in color until earthed up, then the stalks blanch to a beautiful golden yellow. Matures in 110 to 120 days.

- Pkt. (over 1500 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 30c.

---

**White Plume**
This variety is on the market which is the earliest and most easily blanched of any celery in cultivation. It grows rapidly, being easily blanched through the summer months, but is not as long keeper as some sorts. Matures about 110 days.

- Pkt. (over 1500 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 30c.

---

**Cauliflower**

**Mills Early Favorite**
The best sort for inexperienced growers, as it will head when conditions are unfavorable. It may be used either for an early or a late crop and is ready in about 11 weeks. It forms large, firm, fine-grained heads, very white in color.

- Pkt. (150 to 200 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c; ½ oz., 75c.

**Dry Weather Cauliflower**
Dwarf variety, adapted for growing in dry locations where nearly all other varieties fail. It produces large, solid, pure white heads which remain in good condition longer than Cauliflower. Ready for table in 100 days.

- Pkt. (150 to 200 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c; ½ oz., $1.00.

**Early Snowball**
A popular extra early variety of dwarf, compact growth, good for both early and late planting. Makes a good, solid pure white head of good size. Matures in about 105 days.

- Pkt. (about 150 seeds), 6c; 3 pkts., 15c; 6 pkts., 20c; ½ oz., $1.50.

---

**Broccoli**

**LARGE WHITE.** Cultivate and use same as Cauliflower. Produces large white heads which remain in good condition longer than Cauliflower. Ready for table in 100 days.

- Pkt. (150 to 200 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c; ¼ oz., 35c.

**Brussels Sprouts**

**PERFECTION.** One of the best vegetables for fall and winter use. Plant grows about 2 feet high, thickly set with good sized sprouts of fine flavor. Ready for table in 110 to 120 days.

- Packet (250 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; ½ oz., 25c.

**Mustard**

Used for flavoring in pickles.

- Black, pkt. (1000 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c; ½ oz., 35c.

---

**Celeriac or Turnip-Rooted Celery**
Forms a turnip shaped root with flavor of fine Celery. Splendid for stews, soups, and salads, or boiled like Parsnips. Easily grown.

- Pkt. (1000 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c.

**Cress**

**GRASS.** Used for salad, quick growing, leaves finely cut, crisp, and pungent. Ready for the table in 20 days.

- Pkt. (400 seeds), 5c; 3 pkts., 10c; 6 pkts., 15c.

**Dandelion**
The young leaves are used for "greens" and very popular as a spring tonic.

- Pkt. (300 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

---

**White Plume Cauliflower.**

**True Georgia Collards.**

**Wiltproof.** Used as a winter salad. Sow seed in open ground root later than June. Lift the roots in the fall and store in soil in a cool place until wanted for forcing. Puts in any warm cellar or room.

- Pkt. (200 seeds), 5c; 3 pkts., 10c; 6 pkts., 20c.
Sweet or Sugar Corn

For first early plant First of All; second early, Golden Bantam and Golden Evergreen; for late crop, Country Gentleman and the Evergreens. Sweet Corn can be raised on any good ordinary soil if it is thoroughly worked before planting, but a rich warm soil is best. Give frequent and thorough cultivation until the tassels appear.

Golden Bantam
The most famous Sweet Corn in cultivation. The stalks grow only 4 to 5 feet high, usually bearing 2 or more ears to a stalk. When ears are ready for use they are a creamy yellow in color, being rich, sugary, and sweetest of all. Golden Bantam is suited for extra early and late plantings up to July 10th. Ready to use in 60 to 75 days.

Pkt. (over 100 seeds): 5c; 3 pkts., 12c; ½ lb., 21c; lb., 36c; 3 lbs., $1.00 postpaid.

Mills First of All
It is one of the earliest Sweet Corns for the home garden, its being a few days earlier than all others not only makes it valuable for family use but extremely valuable for market. It is rather dwarf in growth but produces good sized ears of superior quality, tender and sweet. My customers plant this variety very extensively every year. Under favorable conditions matures in about 55 days.

Pkt. (over 100 seeds), 5c; 3 pkts., 12c; ½ lb., 21c; lb., 36c; 3 lbs., $1.00 postpaid.

White Evergreen
This is similar in quality, type of ear, etc., to Stowell’s Evergreen, but is a few days earlier. The kernels are clear white, closely set in rows on a small cob, and usually have 16 or more rows of deep grains to the ear. The flavor is remarkably sweet and it retains its delicate flavor and pure white color when canned. I can recommend this corn for the home garden, for market, and for canning. Ready to use in 60 to 68 days.

Pkt. (over 100 seeds), 5c; 3 pkts., 12c; ½ lb., 18c; lb., 33c; 3 lbs., 66c, postpaid.

Golden Evergreen
This new variety combines the size of ear of the Evergreen type with the color and delicious quality of the Golden Bantam. The ears are of good size, well filled with deep kernels of rich yellow color. In quality it is equal to the famous Golden Bantam. For the home garden and fancy market trade it is a great Corn, furnishing such large ears of such superior quality and sweetness. Ready to use in 70 to 79 days.

Pkt. (over 100 seeds), 5c; 3 pkts., 12c; ½ lb., 18c; lb., 36c; 3 lbs., $1.00, postpaid.

Stowell’s Evergreen
The old well known variety for home use, market, and canning. The grains are of good size, long, and slender, and it is highly recommended on account of its sweetness and good canning qualities. Ready in 60 to 100 days.

Pkt. (over 100 seeds), 5c; 3 pkts., 12c; ½ lb., 18c; lb., 36c; 3 lbs., 66c, postpaid.

Country Gentleman
One of the finest and sweetest of all Sweet Corns for the table. As shown by the photograph the kernels on the cob are irregular, plump, pearly white, and tender. Ears average 7 to 9 inches in length, cobs small, and grain is very deep. Another good point is its prolificacy, rarely producing less than 3 ears to the stalk. Ready to use in 80 to 85 days.

Pkt. (over 100 seeds), 5c; 3 pkts., 12c; ½ lb., 18c; lb., 36c; 3 lbs., 66c, postpaid.
**Pop Corn**

Quick Pop.

Quick Pop A very early variety, producing from 2 to 4 perfect ears on a stalk, of a beautiful golden yellow color. This corn is very quick to pop, hence its name, and the kernels expand to a large size when popped. Matures in 90 to 100 days.

Pkt. (about 100 seeds), 5¢; 2 pks., 12¢; 6 pkts., 20¢.

Mapledale Prolific The most prolific Pop Corn, enormously productive. They produce several ears to a stalk, often 7 to 10 inches long, well filled with bright, handsome white kernels; it is an excellent corn for popping but on account of its prolific growth it requires from 140 to 150 days to mature.

Pkt. (about 100 seeds), 5¢; 3 pkts., 12¢; 6 pkts., 20¢.

**Australian Huless**

Also known in some sections as Japanese Rice or Tom Thumb Pop Corn. It is a heavy yielder, has attractive ears, peculiar in form, being round and smooth, as long as shown in the photograph. The kernels are similar in color to White Rice only larger and slimmer and pearly white in color, but its crowning merit lies in its popping quality and fine flavor. It deserves special attention and you should try it. Matures in about 130 days.

Pkt. (about 100 seeds), 5¢; 3 pkts., 12¢; 6 pkts., 20¢.

HOW TO MAKE POP CORN BALLS

Cook 1 pint of syrup, 1 pint of sugar, 2 tablespoons butter, and 1 teaspoon of vinegar until it hardens when dropped in cold water. Remove to the back of stove and add ½ teaspoon of soda dissolved in a tablespoon of hot water and then pour hot syrup over 4 quarts of freshly popped corn, mixing well until each kernel is coated, when it can be shaped.

**Black Beauty**

Ears are fair sized and the kernels round and smooth, not sharp and pointed like White Rice. It is quite early and although the kernels are black they show up nice and white when popped. Tender and crisp. Matures in about 120 days.

Pkt. (about 100 seeds), 5¢; 3 pkts., 12¢; 6 pkts., 20¢; ½ lb., 25¢; lb., 40¢.

**White Rice**

Everybody knows the old variety called White Rice. My strain is the very best, stalks grow strong, producing 3 to 4 nice well developed ears to a stalk. The pearly white kernels are pointed and are set closely on a small cob, protected by a thick strong husk. Matures in 120 to 140 days.

Pkt. (100 to 150 seeds), 5¢; 3 pkts., 12¢; 6 pkts., 20¢; ½ lb., 25¢; lb., 30¢.

Try My Gladiolus This Year

See Inside Front Cover

**American Wonder**

This is the largest Pop Corn I have ever seen. It is truly a wonder for size, quality, and yield. Stalks grow very strong producing from 3 to 4 perfect ears from 7 to 10 inches long as shown by the photograph. The kernels are large, nearly as large as early Flint Field Corn. The stamens are numerous, nearly as numerous as the ears. It is a surprise to all those who have never seen this corn. Matures in about 100 days.

Do not fail to try it.

Pkt. (about 100 seeds), 5¢; 3 pkts., 12¢; 6 pkts., 20¢.

Be sure and sign your name and address to every order so you will get your seeds promptly.

**Brazillian or Stooling Flour Corn**

This corn comes to me very highly recommended and is pronounced a great stooling variety. Each stalk bears 2 to 4 ears, 5 to 6 inches in circumference and 9 to 12 inches in length. It produces a great abundance of fodder and I know of no variety that will equal it for ensilage. It is the best variety for poor soil and the kernel contains more starch than others, and if ground and heated with the same process as wheat gives a fine flour. The kernel is pure white in color and occasionally one shaded brown appears. It bears an immense yielder of both corn and ensilage and I highly recommend it to my customers in the North, East, South, and West, and as I have a fair crop I can offer it at attractive prices.

Pkt. (about 100 seeds), 6¢; 3 pkts., 15¢; 6 pkts., 25¢; 1 lb., 35¢; 5 lbs., $2.00, postpaid.

**Egyptian Wheat Corn**

Originally came from India and is frequently called Californian Rice Corn and Californian Wheat. It is quite an interesting novelty and grows tall and strong and is an excellent feed for horses and cattle when cut green and the seed when ripe is excellent for poultry. It will outyield Kafr Corn or Oats, and a small quantity of seed will produce a great quantity of feed and a good grain crop.

Pkt. (about 200 seeds), 5¢; 3 pkts., 15¢; 6 pkts., 20¢; 1 lb., 30¢; 5 lbs., $1.00, postpaid.
Cucumbers

Special Mixture This mixture is made up of all kinds and by planting it you will have an abundance of cucumbers for slicing and pickling all summer. All Kinds Mixed, pkt. (about 150 seeds), 4¢; 3 pks., 9¢; 6 pks., 12¢; oz., 18¢; ½ lb., 30¢.

Mills Earliest Everbearing This is a grand early everbearing variety and not only extremely prolific but will continue in bearing throughout the season. The fruits are a rich deep green color, medium in size, being produced in abundance, closely set on strong vines. Flesh white, very firm and crisp. It is the first to come and the last to go, fruiting all the time. Ready to use in 50 to 60 days.

Pkt. (about 150 seeds), 4¢; 3 pks., 9¢; 6 pks., 12¢; oz., 18¢; ½ lb., 40¢.

Japanese Climbing This variety originally came from Japan. Young plants grow strong and bushy and as soon as they are well established begin to climb, or creep, and may be grown on fences, poles or trellises. Fruits are from 12 to 15 inches in length, skin smooth, dark green, flesh pure white, crisp, and mild flavor. Can be picked in about 55 days.

Pkt. (about 150 seeds), 5¢; 3 pks., 12¢; 6 pks., 20¢; oz., 15¢.

Davis Perfect A very fine cucumber for market as well as for the home garden. Fruits grow from 7 to 9 inches long, tapering at both ends with an intensely dark green skin.

Nichols Medium Green Handsome variety, straight and smooth, excellent for pickling and good for slicing when mature; dark green; crisp and tender. Matures in about 50 days. Pkt. (about 150 seeds), 4¢; 3 pks., 10¢; 6 pks., 18¢; oz., 11¢; ½ lb., 35¢.

Mills Earliest White Spine A special strain of the White Spine type; one of the finest cucumbers of the White Spine type; fruit 7 to 9 inches long, flesh white, firm, and crisp. Ready in about 45 days.

Pkt. (about 150 seeds), 4¢; 3 pks., 10¢; 6 pks., 18¢; oz., 11¢; ½ lb., 35¢.

Improved Long Green This is a well known variety and very popular. Fruits grow from 10 to 16 inches in length and are of superior quality. Flesh very firm and crisp. The young fruit is used very largely for pickling and full-sized cucumbers are largely used for slicing and for making the so-called sweet pickles when the fruits are ripe and yellow. Ready to pick in about 65 days.

Pkt. (about 150 seeds), 4¢; 3 pks., 10¢; 6 pks., 18¢; oz., 12¢; ½ lb., 40¢.

Early Fortune One of the finest cucumbers of the White Spine type; fruit 7 to 9 inches long, flesh white, firm, and crisp. Ready in 45 days.

Pkt. (about 150 seeds), 4¢; 3 pks., 10¢; 6 pks., 18¢; oz., 11¢; ½ lb., 35¢.

Long China Cucumber Remarkable new long green cucumber from China. When mature they average from 15 to 16 inches long, and 2 to 3 inches in diameter, flesh solid, crisp, good flavor. Vines strong and vigorous, matures in from 65 to 70 days. Do not fail to try this wonderful variety.

Pkt. (about 50 seeds), 6¢; 3 pks., 18¢; 6 pks., 35¢.
Lettuce

To have the best Lettuce it should be kept growing rapidly, giving plenty of sunlight and moisture. A light, rich soil is best. For a succession plant every two or three weeks.

Black Seeded Simpson
Large curled or loose leaf Lettuce, very tender, crisp, fine quality and sweet flavor. Ready in 40 days. Pkt. (over 1000 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 25c.

Mills Earliest or 12-Day
The earliest, standing frost to a remarkable degree. 1 knows of no other Lettuce that can approach it for extra earliness, hardness and growth. Leaves are heavily fringed and crumpled, light green color, crisp and tender. Ready in 50 to 48 days. Pkt. (over 1000 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 25c.

Early Prizehead
Leaves very large, bright green tinged with brownish red at the edges, forming a large loose head, very tender, crisp, and sweet. Ready in about 45 days. Pkt. (over 1000 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 25c.

All-Seasons Lettuce Collection
A sowing produces a salad for the entire season. My collection is a grand assortment of all the different early, medium and late sorts; just right for the home garden, all being crisp and tender. Ready in 30 to 60 days. Pkt. (over 1500 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 25c.

In order to keep Lettuce crisp, place the roots in cold water but do not cover the leaves until washing for serving, and then rinse in a pan of ice water if possible.

Black Seeded Simpson Lettuce

Big Boston
Large headed variety, grown all over the country both North and South for market. Forms big, tender, and crisp heads of rich yellow color, inside of fine quality. It is adapted to open ground for summer and fall use or to growing in frames to force. It withstands adverse weather conditions. Ready in about 55 days. Pkt. (over 1000 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 25c.

Grand Rapids
A curled or loose leaf Lettuce of rapid, upright growth, retaining its freshness a long time after being cut, good for forcing, crisp, and sweet. Not liable to rot, standing several days after being ready to eat without injury. Ready in about 60 days. Pkt. (over 1000 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 25c.

Improved Hanson
Forms large heads having a sweet rich flavor, soon from earliest spring until late in fall. A sure-heading sort standing the heat remarkably well. Ready in about 50 days. Pkt. (over 1000 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 25c.

Romaine or White Cos
Leaves being well folded toward the center, bleaches almost pure white, is crisp, and tender. Ready in about 65 days. Pkt. (over 1000 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c.

Kale or Borecole
Splendid "Greens" for early fall, winter or spring use.

DWARF GREEN CURLED
Plant is dwarf and compact with large, deep green leaves curled and crumpled. Ready to cut in about 60 days. Pkt. (100 to 200 seeds), 5c; 3 pkts., 12c; 6 pkts., 18c; oz., 25c.

Okra or Gumbo
WHITE VELVET Pod round, smooth, of white velvety appearance, very tender, nice for soups, stews, etc. Ready in about 65 days. Pkt. (over 50 seeds), 5c; 3 pkts., 12c; 6 pkts., 18c; oz., 25c.

Crisp-as-Ice

Kohl Rabi
Finer flavor and sweeter than Turnips. Slow seed in spring and again in June and July.

EARLY WHITE VIENNA
Skin pale yellow, flesh white and tender, excellent forcing variety, ready in about 60 days. Pkt. (100 to 500 seeds), 5c; 3 pkts., 12c; 6 pkts., 18c; oz., 25c.

EARLY PURPLE VIENNA
Skin deep purple, flesh pithy white, tender, and fine flavored. Ready in about 65 days. Pkt. (100 to 500 seeds), 5c; 3 pkts., 12c; 6 pkts., 18c; oz., 25c.
Watermelons

NEW WINTER WATERMELON

The fruits of this new melon are of medium size, round, pale yellow when ripe, flesh bright red, crystalline, sweet as honey. Seeds very small, black. Take fruits from garden before frost and store in cool cellar. They will keep in perfect condition for at least 60 days. Matures in 80 to 85 days.

- Pkt. (50 seeds), 5c; 3 pkts., 15c; 6 pkts., 25c.

Baby Delight

This melon is round and will weigh from 3 to 6 pounds, is always solid and of a very sweet flavor. It is very desirable for the home garden, especially in the North where other Watermelons will not mature.

- Pkt. (50 seeds), 5c; 3 pkts., 15c; 6 pkts., 25c.

Wonderful Sugar

A large, oblong, dark green melon, with broad stripes of lighter green. Flesh is rosy pink, solid, sweet, and delicious, very prolific and withstands weather conditions well. The rind is too delicate to withstand shipment but it has become very popular as a home garden melon. It will mature in about 85 days.

- Pkt. (50 to 75 seeds), 4c; 3 pkts., 9c; 6 pkts., 15c; oz., 25c; lb., 1.00.

Dixie Watermelon

The fruits are large, oblong in shape, from 18 to 24 inches in length, skin dark green with stripes of lighter shades. Flesh bright red and of excellent quality. Ready in 80 to 90 days.

- Pkt. (50 to 75 seeds), 4c; 3 pkts., 9c; 6 pkts., 15c; oz., 25c; lb., 1.00.

Tom Watson—The Best Shipper

The Most Popular of All Watermelons

This new melon, although of recent introduction, now occupies a very prominent place in all the markets. It is a long, green variety covered with a fine netting giving it a most attractive appearance. The rind is thin but hard and tough so that it is unequalled as a market and shipping melon. The flesh is tender and in color, being of superb quality. It is a great shipper and a money maker for all melon growers. The melon is of large size and heavy, averaging from 18 to 24 inches long by 8 to 12 inches in diameter and weighs from 20 to 60 lbs. I can highly recommend it as a market melon. Matures in about 85 days.

- Pkt. (50 to 75 seeds), 4c; 3 pkts., 9c; 6 pkts., 15c; oz., 25c; lb., 1.00.

Apple Pie Melon

Excellent for Pies, Preserving, Etc.

This melon has fruit similar to the Watermelon but the flesh is used exclusively for sauces, pies, preserves, etc. The flavor somewhat resembles apples, the flesh being solid and white. Each melon will produce 5 to 10 large sized Melons and they will be fresh and solid nearly all winter, so they can be used when wanted. Two Melons will make nearly as many pies as a barrel of apples. Give it a trial. Matures in about 100 days.

- Pkt. (about 50 seeds), 5c; 3 pkts., 15c; oz., 25c; lb., 75c.

Sweet Heart

This is a large Watermelon nearly spherical in shape, but a little longer than thick. The skin is a bright mottled green, the flesh red, firm, crisp, and exceedingly sweet. A good keeper, excellent shipper, and matures in about 80 days.

- Pkt. (50 to 75 seeds), 4c; 3 pkts., 9c; 6 pkts., 15c; oz., 25c; lb., 1.00.
Kleckley Sweets

One of the most popular, early, large Water Melons grown, and desirable to plant for home use or nearby markets. The fruits are very attractive, oblong in form and have a glossy dark green skin. The rind is thin and the flesh is a beautiful bright scarlet in color, crisp, and sugary. It gives satisfaction everywhere and I can recommend it for both North and South. Matures in about 85 days.

Pkt. ($0.12 to $0.15), 4c; 3 pkts., 10c; 5 pkts., 15c; 10 oz., 9c; 1 lb., 30c.

**Muskmelons**

**Yellow Meated Prize (ORANGE FLESH)**

This is an early Melon of the solid netted type, and a very desirable one to grow. It has a very small seed cavity with thick, sweet, luscious flesh of a rich, orange color. It is a splendid keeper, and stands shipping well. Matures fruits in about 75 days.

Pkt. ($0.15 to $0.20), 2c; 3 pkts., 10c; 5 pkts., 15c; 10 oz., 9c; 1 lb., 30c.

**Mills Earliest (SALMON FLESH)**

One of the earliest and best salmon-fleshed Melons, and is excellent for the home garden or for shipping. Melons are a nice size and shape as shown by the illustration and the flavor cannot be surpassed. Flesh is very thick, fine-grained, and of a rich luscious flavor. It is finely netted and a very even size.

Pkt. (about 200 seeds), 5c; 3 pkts., 10c; 5 pkts., 15c; 10 oz., 9c; 1 lb., 30c.

**Emerald Gem (SALMON FLESH)**

This is a beautiful Melon and is truly a gem. It is early but will not stand shipping any great distance to market, but is unequalled for home use or for nearby markets. If fruits are gathered as soon as they ripen, the vines will continue bearing throughout the season. The melons are slightly flattened. The skin is smooth and heavily ribbed. The flesh is very thick and acknowledged to be the most delicious in flavor while the seed cavity is small.

Pkt. (about 200 seeds), 5c; 3 pkts., 10c; 5 pkts., 15c; 10 oz., 9c; 1 lb., 30c.

**Bush (GREEN FLESH)**

The fruits are of the popular Jenny Lind type, 5 to 6 inches in diameter and very early. It is one of the sweetest and best flavored of all green-fleshed sorts. On account of its compact growing habit it does not require too much room, making it very desirable for the home garden. Matures in about 65 days.

Pkt. ($0.10 to $0.15), 5c; 3 pkts., 10c; 5 pkts., 15c.

**Montreal Market (GREEN FLESH)**

This well known Melon is of large size, often weighing 15 to 20 lbs. each. The skin is green and the flesh is light green in color and of delicious melting flavor. For the vine is a very prolific grower and fruits mature in about 80 days. This melon commands high prices on the Eastern markets in the late fall months, and is a good shipper.

Pkt. ($0.20 to $0.25), 4c; 3 pkts., 10c; 5 pkts., 15c; 10 oz., 9c; 1 lb., 30c.

**Netted Gem or Rocky Ford (GREEN FLESH)**

A well known prolific melon. The vines are healthy and vigorous, producing an enormous quantity of fruit during the season, which are all very uniform in size and shape. Skin a rich dark greenish gold when fully ripe with fine netting. Flesh is light green in color, very deep, ripening clear to the rind while the flavor is rich and luscious. Matures in about 75 days.

Pkt. ($0.20 to $0.25), 4c; 3 pkts., 10c; 5 pkts., 15c; 10 oz., 9c; 1 lb., 30c.

**Honey Dew (GREEN FLESH)**

The fruits are smooth, rind almost white, averaging about 6 inches in diameter by 7 to 8 inches long. The green flesh is thick and has a peculiar sweet flavor, something like that of honey. It requires a little warmer and longer season than other melons and are at their best about 90 days. Matures in about 90 days. Can be very profitable if the market warrants it.

Pkt. (about 100 seeds), 4c; 3 pkts., 10c; 5 pkts., 15c; 10 oz., 9c; 1 lb., 30c.
Golden Heart Musk melon

As photo shows, grows nearly round, medium size, firm, thick, tender, and of a beautiful golden salmon color. Flavor is excellent, being sweet and delicious. Ripe perfectly clear to the skin, and the thin rind is of dark rich green color. The vines are very productive, fruits set early and cluster about the vine. As shown, Golden Hearts are nearly round and average about 6 inches in diameter. It is an excellent shipper, and is taking the lead in the market wherever introduced. It is a splendid keeper. It is a melon that is hard to beat, and every home gardener should grow some of these melons. Will produce ripe fruits in about 70 days. Pkt. (100 seeds), 5c; 3 pkts. 12c; 6 pkts. 20c; oz. 25c.

Jenny Lind (green flesh)

This is the earliest of the green-fleshed sorts and one of the sweetest. In size it is small, measuring from 3 to 6 inches in diameter. Seed cavity small. Vines are very prolific and mature fruits in about 60 days. Pkt. (150 to 200 seeds), 5c; 3 pkts. 10c; 6 pkts. 18c; oz. 50c.

Mixed Musk melons

This is a splendid mixture of green, orange, and saldemonfleshed varieties, maturing from the very earliest to the late varieties. By planting this mixture one is sure to produce some melons that are suited to their climate. Excellent assortment for the home garden. Pkt. (200 to 300 seeds), 5c; 3 pkts. 12c; 6 pkts. 18c; oz. 50c.

Banana (Orange Flesh) Melon

This curious variety of Melon attains a length of 12 to 25 inches and a diameter of 3 to 6 inches, maturing in about 85 days. The flesh is deep yellow and of excellent flavor. It is a good melon for home use and long storage. Pkt. (about 200 seeds), 5c; 3 pkts. 12c; 6 pkts. 18c; oz. 50c.

Santa Claus Casaba

Known as the Winter Musk Melon and is in prime condition to eat during the holiday season. As shown by the illustration, it is an ornamental melon. The flesh is deep, almost yellow, and round. Pkt. (50 to 100 seeds), 5c; 3 pkts. 10c; 6 pkts. 18c; oz. 25c.

Golden Beauty Casaba

The melons are nearly round in shape, bright yellow with a golden tint and wrinkled skin. Grows from 6 to 8 inches in diameter, flesh is white, and of excellent flavor. Matures in about 120 days and excellent for storing for the winter season. Pkt. (50 to 100 seeds), 5c; 3 pkts. 10c; 6 pkts. 18c; oz. 25c.
Radishes

Mills Earliest or 15-Day

If you wish to have the first radishes, sow this one.

The skin is a rich scarlet color, flesh pure white, tender, mild and sweet. It is a favorite wherever grown.

Pkt. (about 500 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 10c; ½ lb., 25c.

Mr. Joseph Schuman of Brown Co., Ohio, writes: I am sending you a sample of radishes that I raised from the trial packages of seeds you sent me when I ordered my radish seed from you last Spring. They are surely a true Radish and are ready in from 12 to 15 days after planting.

Icicle

The finest of the early long white radishes, being pure white in color, long, slender, and tapering in shape. It grows quickly to market size, is crisp and brittle and of mild, sweet flavor. Regarded by many as the finest radish grown. Plant every 10 days for succession. Ready for use in 25 to 30 days.

Pkt. (about 500 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 12c; ½ lb., 25c.

Giant Butter

This is a giant Radish, bright scarlet in color, small top, flesh very tender, crisp, with zones of pink. Very mild in flavor and a long keeper. It is excellent for forcing or early spring planting and considered quite a novelty. For lack of room I am unable to illustrate it. Matues in about 25 days.

Pkt. (400 to 500 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 12c.

California Mammoth White Winter

The best of all large white radishes. Grows very large, skin white, flesh solid, crisp, and sweet as turnip. May be used in all stages of growth.

Pkt. (400 to 500 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 10c; ½ lb., 25c.

Rose China Winter

Very handsome, of medium size, rose colored. Flesh white and mild for a winter radish. Matues in about 60 days.

Pkt. (about 500 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 10c; ½ lb., 25c.

Long Scarlet Short Top

Roots long, straight, smooth, rich scarlet color, very crisp and a quick grower. Ready in about 35 days.

Pkt. (about 500 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 10c; ½ lb., 25c.

All-Seasons Mixture

This mixture contains a great collection of all kinds, colors, and shapes, for the home garden, especially where the space is limited.

One sowing is all that is required for a continuous supply, as they become ready for use from about 18 to 30 days.

Pkt. (400 to 500 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 10c; ½ lb., 25c.

French Breakfast

Just right for a small, crisp, mild Radish. Of quick growth, oblong in shape, beautiful scarlet color except tip which is pure white. An old favorite for the home garden, ready to use in about 22 days.

Pkt. (400 to 500 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 10c; ½ lb., 25c.

Order Several Kinds of My Radishes.
Prize Taker (American Grown)

This three times as large as the Globe Danvers under the same conditions, weighing 4 to 5 lbs. each. The plants grow strongly and it requires 3 to 4 weeks longer season than the Danvers. Skin is thin, of a bright straw color, flesh pure white, crisp, very mild and sweet in flavor. Prize Taker is a very satisfactory onion to grow from seed planted directly in the row, but in dry season and light soil the bulbs while ripening normally and quite early will not attain such large size as in more favorable location and conditions. Will mature in from 100 to 140 days.

Pkt. (over 500 seeds), 4c; 3 pks., 10c; 6 pks., 18c; oz., 20c; lb., 60c; lb., $2.00.

Giant Australian Brown

This is a very early, extra early, and long keeping variety. It matures earlier than Globe Danvers but somewhat resembles it in size and shape, yielding a larger crop in both weight and bulk. The skin is a reddish brown in color, and the flesh is white, exceedingly solid, crisp, and of mild, sweet flavor. I believe it is the longest keeping onion, bulbs having been kept in fine condition for over two years after they were harvested. It is a splendid onion for the North and matures in 80 to 100 days.

Pkt. (over 500 seeds), 4c; 3 pks., 10c; 6 pks., 15c; oz., 15c; lb., 60c; lb., 1.75.

Large Red Wethersfield

This is one of the most popular of the Northern States. It does not ripen as early as some onions, consequently it continues in growth throughout the season, making very solid onions. The large onions are well flattened but thick through as shown by the illustration. The outer skin is a deep, rich, purplish red, smooth and glossy; flesh white, lightly tinged with pinkish rose, and very mild in flavor. Its splendid keeping qualities make it easy to hold crops for winter prices. I offer the very best strain of Red Wethersfield which will mature in about 115 days.

Pkt. (over 500 seeds), 4c; 3 pks., 10c; 6 pks., 18c; oz., 20c; lb., 60c; lb., 2.00.

Onion seed is very important—many poor strains are on the market. Onions are best suited to produce large crops under intensive cultivation, and I believe more dollars worth of onions can be grown on an acre than most any other crop. I have been supplying the best onion seed to my customers for the past 28 years.

Extra Early Red

An extra early red Onion, well flattened but quite deep. The bulbs are of medium size, rich red in color, very close-grained, solid and heavy. It will form bulbs in cold mucky soil where other varieties fail to ripen. Highly recommended for the North where the seasons are short and cool. It can be made to produce fine onions in about 90 days.

Pkt. (over 500 seeds), 4c; 3 pks., 10c; 6 pks., 18c; oz., 20c; lb., 60c; lb., 2.00.

Mills Selected Yellow Globe Danvers

This is a magnificent Onion—the standard variety for winter use. It produces bulbs averaging about 2 inches in diameter and nearly globe-shaped. The skin is a beautiful pale yellow and the flesh is pure white, crisp, and mild in flavor. The plants have very slender necks and consequently the bulbs keep well over winter. It ripens up uniformly and is an immense cropper: over 900 bulbs per acre have been raised. On account of its attractive shape and color, and its excellent keeping qualities, it always brings a good price in the markets. Matures in about 110 days.

Pkt. (over 500 seeds), 4c; 3 pks., 10c; 6 pks., 18c; oz., 20c; lb., 60c; lb., 2.00.
Mammoth Silver King
This mammoth white variety is one of the largest in cultivation. The large bulbs are of attractive form, flattened but quite thick through, and under good cultivation will average from 3 to 7 inches in diameter. The skin is a beautiful silver-white, flecked white, tender, and of a mild sweet flavor. Mammoth specimens can be grown from seed sown early in spring, maturing in 90 to 110 days. Pkt. (300 to 500 seeds), 4¢; 3 pks., 10¢; 6 pks., 18¢; oz., 25¢; ½ lb., 75¢.

Mills White Pickling
This is the earliest ripening onion in cultivation, and the best of all for small pickles. The onions are a pure papery white in color, averaging from 1 to 1½ inches in diameter of very mild and delicate flavor. Fine for bunching for early market, gardeners planting largely of this variety which commands high prices in all markets. Ready to use in 70 to 80 days. Pkt. (about 300 seeds), 4¢; 3 pks., 12¢; 6 pks., 20¢; oz., 30¢.

Early White Welsh
The best kind for green onions for it does not form a bulb. It is a hardy, used only for bunching, or for early green onions. The shoots attain marketable size quickly, and sell at top prices before green onions grown from sets are on the market. It is nearly white in appearance and mild in flavor. Seed may be sown in early spring in rows 12 to 18 inches apart for summer use, or in late summer or fall months for early spring; onions being very hardy require no winter mulching. Pkt. (about 300 seeds), 5¢; 3 pks., 12¢; 6 pks., 20¢; oz., 30¢.

American Flag Leek
The stalks are of mild onion flavor and used same as onions. It is very hardy, strong, and vigorous grower, broad leaves and ready to use in about 85 days. Sow seed in early spring in rows about 1 foot apart and thin to 4 to 6 inches apart in rows. Ready for table in about 85 days. Pkt. (about 200 seeds), 5¢; 3 pks., 12¢; 6 pks., 18¢; oz., 25¢.

Chives
A hardy onion-like plant highly prized by some for use as a salad. The green stems have an excellent onion flavor for soups. Pkt. (about 50 seeds), 6¢; 3 pks., 12¢; 6 pks., 25¢.

New Zealand Everbearing Spinach
This is an entirely distinct species, and ideal for the home garden. If planted early in spring will produce an abundance of thick, juicy, tender branches of fine quality. It resists heat and makes a strong growth producing its tender branches throughout the hottest summer months when ordinary spinach is bolting. Pkt. (about 100 larger seeds), 5¢; 3 pks., 10¢; 6 pks., 18¢; oz., 25¢.
PEAS

Mills First of All This is one of the very best extra early smooth Peas. The vines are quite slender, of very quick growth, and average 20 to 30 inches in height. The pods are well filled with smooth, round, creamy white peas that ripen so evenly as not to require more than two pickings, and sometimes if the season is very favorable one picking will take the entire crop. Quite a favorite for very early spring planting.

Pkt. (150 to 200 seeds), 6c; 3 pkts., 15c; ½ lb., 25c; lb., 46c; 3 lbs., $1.10 postpaid.

The Peas and Beans I offer are all grown from hardy and robust Northern stock, which produce more peas or beans to the pod and more pods to the plant than other stocks not Northern grown.

American Wonder This is the earliest wrinkled Pea. The vines grow 10 to 12 inches high and are very prolific in producing pods well filled with large luscious peas. Peas planted in May will mature in 35 to 40 days and on account of requiring no brush or other support is well adapted for the home garden.

Pkt. (150 to 200 seeds), 6c; 3 pkts., 15c; ½ lb., 24c; lb., 45c; 3 lbs., $1.20 postpaid.

Gradus or Prosperity This Pea is claimed by many the best early wrinkled pea in existence. The vines have heavy stems and grow about 3½ to 4 feet tall bearing large pods from 4 to 5½ inches in length, well filled with peas of large size. The finest flavor. Ready for use in about 55 days.

Pkt. (100 to 150 seeds), 6c; 3 pkts., 15c; ½ lb., 26c; lb., 46c; 3 lbs., $1.20 postpaid.

Champion of England The vines grow strong, 4 to 5 feet tall; one of the oldest and best wrinkled peas in cultivation. The fine large pods are filled with large peas of delicious flavor. Cannot be over praised as a standard late sort. It matures in 75 to 80 days.

Pkt. (about 200 seeds), 6c; 3 pkts., 15c; ½ lb., 22c; lb., 40c; 3 lbs., $1.10 postpaid.

Telephone The vines grow on an average from 3½ to 4½ feet tall, and a profitable wrinkled main crop sort. Pods are of good size, well filled with from 6 to 8 large peas of rich, sweet flavor. It is a sure cropper and the quality of the Telephone is hard to beat. In the Northern States a late pea like the Telephone planted about July 1st will usually bear until a hard frost. Fit for picking in about 70 days.

Pkt. (about 150 seeds), 6c; 3 pkts., 15c; ½ lb., 24c; lb., 45c; 3 lbs., $1.20 postpaid.

Thomas Laxton

This is a rival to the famous Gradus or Prosperity, having wrinkled seed producing a long-podded extremely early pea. Plant grows about 3 feet high, being identical with Gradus, but the pods are a deeper, richer green, and experts claim it is even sweeter and finer in flavor. The crop ripens only a few days after Gradus, and is ready to pick in about 55 to 60 days.

Pkt. (100 to 150 seeds), 6c; 3 pkts., 15c; ½ lb., 24c; lb., 45c; 3 lbs., $1.20.
PEAS

Unsurpassed Everbearing

(Second Early)

A grand wrinkled Pea growing about 2 feet high. It has a remarkable branching habit and is a continuous long season bearer, especially adapted to summer and autumn cropping. The peas produce well-filled pods, the peas being very large, tender and of superior quality. It will do well without thinning and will produce pods for picking in 60 to 65 days.

Pkt. (100 to 125 seeds), 6c; 3 pks., 18c; 1/2 lb., 45c; 1 lb., $1.25 postpaid.

Unsurpassed Everbearing Peas.

Mills Enormous Giant of the Pea Family

The Largest Podded and the Heaviest Cropper

There are few varieties of seed in this Seed Book that are better named than this Giant Pea, when you consider that it will produce pods attaining the extraordinary length of 7 inches and upwards, closely packed with from 10 to 15 dark green peas of fine flavor. The plant is of branching habit growing about 5 feet in height with dark green foliage. It is of very vigorous and robust constitution which enables it to withstand drought and mildew. The pods are produced in great profusion, mostly in clusters, making an attractive appearance. Every customer will be delighted with this giant pea. A few plants growing in your garden will produce a great quantity of pods and peas and will prove profitable as well as interesting. For the best results give the vines a little support. Matures in 70 to 80 days.

Pkt. (100 to 150 seeds), 6c; 3 pks., 18c; 1/2 lb., 45c; 1 lb., $1.25 postpaid.

Mills Enormous Pea.

Peppers

Chinese Giant

The largest, mild, red Pepper. Plants grow stocky about 2 feet in height. Thrives set with enormous fruits 4 to 5 inches in diameter of a brilliant glossy scarlet. Flesh thick and meaty. Ripens in about 140 days.

Plt. (50 to 100 seeds), 5c; 3 pks., $1.25; 6 pkts., 25c; oz., 50c.

Improved Ruby King

Plant grows about 2 feet high and produces a fine crop of large scarlet fruits of sweet, mild flavor, 4 to 6 inches long by 3 to 4 inches thick. Fruit ripens in about 130 days.

Plt. (50 to 100 seeds), 5c; 3 pks., $1.25; 6 pkts., 25c; oz., 50c.

Tomato Pepper

Upright growth, productive, so mild they may be eaten like an apple. Fine for canning or as a salad. Maturing in about 120 days. Plt. (50 to 100 seeds), 5c; 3 pks., 12c.

Tomato Pepper

Chinese Giant Pepper.

Long Red Cayenne

The well-known favorite hot Pepper, fruits conical-shaped 3 to 4 inches long of bright red color, and borne in profusion. Matures in about 120 days.

Plt. (about 100 seeds), 5c; 3 pks., 12c; 6 pkts., 25c.

Pimiento

The sweetest Pepper grown. Very productive; produces medium sized brilliant red peppers maturing in about 120 days.

Plt. (50 to 100 seeds), 5c; 3 pks., 12c; 6 pkts., 25c; oz., 40c.

Pimiento Pepper.

Mills Earliest Pepper

This Early Pepper is a prize for anyone who wants Peppers early in the season. Many people have difficulty in getting pepper plants to bear well, but if you plant Mills Earliest you will be more than pleased. The plants grow from 12 to 15 inches high, and usually produce so many peppers that they seem hardly able to support them, for they are clustered all over the plant. Often early in August some peppers will be ripe, a handsome red in color, and nearly all ripe before frost under favorable conditions. The fruit is of good size, just about right, while the flavor is very mild. For the Northern part of the country this is the only large, sweet pepper that can be relied upon to produce a crop.

Plt. (about 50 seeds), 5c; 3 pks., 12c; 6 pkts., 25c.

Mills Earliest Peppers.

Mixed Peppers

A grand assortment of Peppers whereby anyone can have peppers in 100 to 140 days.

Plt. (75 to 100 seeds), 4c; 3 pks., 10c; 6 pkts., 25c.

Mills Earliest Peppers.
Pumpkins

Golden Sugar Pie
This is one of the best for pies. Fruits are of small size, averaging about 10 inches in diameter. Skin of deep orange yellow, flesh fine grained, sweet, and of delicious flavor. A most prolific yielder, excellent keeper and cannot be excelled as a table pumpkin. Matures in about 90 days. Pkt. (60 to 75 seeds), 4c; 2 pks., 10c; 6 pks., 18c.

Winter Luxury
Enormously productive and claims to be one of the best pie pumpkins in existence in view of its wonderful winter-keeping quality. It is of medium size, slightly oval in shape, evenly and finely netted and is a yellowish russet color. The flesh is a deep golden color, sweet, and tender. Matures in about 90 days. Pkt. (60 to 75 seeds), 4c; 2 pks., 10c; 6 pks., 18c; oz., 12c; 1/4 lb., 35c; 1/2 lb., 50c.

Common Field
This is the ordinary yellow Pumpkin used for planting in corn fields for feeding stock. It grows to large size nearly round and is very productive. A fine sort for market or for family use, and is one of the hardest pumpkins. This Pumpkin often produces very large specimens and is called by some "Big Tom." My stock is extra selected and I know will give good satisfaction wherever planted. Matures in 90 to 100 days. Pkt. (50 to 75 seeds), 4c; 2 pks., 10c; 6 pks., 18c; oz., 25c; 1/4 lb., 35c; 1/2 lb., 50c; 1 lb., 75c; 4 lbs. (enough for 1 acre), $2.50, postpaid.

Mills Giant
This is a prize winning variety growing to an enormous size. But few have any idea of the giant size these pumpkins attain. The flesh is bright yellow, fine grained, and of good quality. Notwithstanding the large size it is excellent for pies. I have raised specimens weighing nearly 200 lbs. and it is not uncommon for my customers to report specimens weighing 100 lbs. or more. This is an excellent pumpkin to plant for show purposes on account of its enormous weight and will create great interest wherever grown. These large pumpkins contain but few seeds so the price is necessarily high. Matures in 110 to 130 days. Pkt. (15 to 20 large seeds), 6c; 2 pks., 12c; 6 pks., 20c; oz., 50c.

Yellow Sweet Potato Pie
This handsome Pumpkin is famed as a pie-maker. The flesh is very thick and fine grained, of a beautiful golden yellow color and in flavor and texture particularly adapted for pie making purposes. A wonderful winter keeping pumpkin remaining in good condition until spring. Matures in about 90 days. Pkt. (50 to 75 seeds), 4c; 2 pks., 10c; 6 pks., 18c; oz., 12c; 1/4 lb., 35c; 1/2 lb., 50c; 1 lb., 75c; 4 lbs. (enough for 1 acre), $2.50, postpaid.

White Cushaw or Jonathan
This is a popular crook-necked variety with a hard creamy white shell. The flesh is yellow, solid, sweet, and excellent for pies and can also be used for stock feeding if desired. It often produces pumpkins fit to use in about 90 days. Packet (50 to 75 seeds), 4c; 2 pks., 10c; 6 pks., 18c; oz., 12c; 1/4 lb., 35c; 1/2 lb., 50c; 1 lb., 75c; 4 lbs., 60c.

Surprise Mixture
This is a special mixture containing a wonderful collection of the different kinds of pumpkins, many of which are not offered separately. You can grow a great lot of pumpkins of all the odd-shaped and mammoth-sized if you plant a little of this seed. The above photograph sent me by a customer shows what was produced from this mixture—pumpkins of every imaginable shape and color. Pumpkins are maturing from 65 to 125 days. Pkt. (75 to 100 seeds), 5c; 2 pks., 12c; 6 pks., 20c; oz., 12c; 1/4 lb., 30c; lb., $1.00.

Parsnip
Seed is slow to germinate and should be given as early as possible in spring in well prepared soil. The roots are improved by frost and should not be dug until late in fall, and stored in the cellar, but many prefer to leave in the ground until spring to be dug as required.

Improved Long Smooth or Sugar
The roots grow uniformly, have a sturdy form, heavy at the shoulder, well round and gradually tapering to the base. The flesh is white, of fine texture, free from core and stringiness, fine flavored, cooking tender, rich and sweet. Enormously productive, maturing in 60 to 85 days, and may be stored in the cellar for winter use or left in the ground until late in fall and dug when weather permits in spring. Pkt. (200 to 300 seeds), 4c; 2 pks., 10c; 6 pks., 18c; oz., 12c; 1/4 lb., 40c; 1 lb., 50c; 5 lbs., 1.00c.
Squash

Improved Hubbard
Most Popular Winter Squash

This is the well known winter squash, planted in more gardens than any other sort. Vines of strong running growth, fruits large, olive-shaped with dark green skin and very rich deep golden yellow or orange-colored flesh, and is very fine grained, solid, dry, and sweet. Ready for market in 70 to 80 days. Keeps well.

Pkt. (40 to 60 seeds), 5c; 3 pks., 12c; 6 pkts., 20c; oz., 15c; 1/2 lb., 50c.

Sai ko. This is a curiously-shaped squash from China, and a good variety for early Winter or even Summer use. The fruit is dark green outside and this flesh is thick, and when cooked is of the most delicious flavor. It is solid and a good keeper, and matures quite early. Is a splendid novelty.

Pkt. (30 to 40 seeds), 5c; 3 pks., 12c; 6 pkts., 20c.

Chiri men
A new Squash from China, rather small but flat, with a delicious flavor. It can be used either in the Fall or early Winter. The flesh is thick, a beautiful golden yellow and fine grained. It can be used for pies and is fine when baked and buttered. Try it.

Pkt. (30 to 40 seeds), 5c; 3 pks., 12c; 6 pkts., 20c.

Mammoth White Bush
Favorite Summer Squash, earlier than any other Summer variety. The illustration shows the shape. The skin is white and flesh is tender when ready for use. It is dwarf, of bushy habit, quite uniform in shape and size, hardy, and very productive. Ready for use in about 50 days.

Pkt. (50 to 75 seeds), 6c; 3 pks., 10c; 6 pkts., 15c; oz., 12c.

MIXED SQUASH
Supplies the table the entire season. This is a wonderful mixture of all known kinds. In it will be found early and late, large, medium, and small varieties, whereby anyone can have a great supply of delicious squashes throughout the entire season, many being good Winter keepers. Matures from in 50 to 100 days.

Pkt. (about 100 seeds), 5c; 3 pks., 12c; 6 pkts., 20c; oz., 15c.

PEANUTS
Peanuts have always been an important crop in the South and will make a crop further North or where 4 months are free from frost. Plant 6 or 8 inches apart in rows 2½ to 3 feet apart, break the pods before planting. Very interesting to grow in the garden in the northern states.

Early Spanish
The earliest variety grown, maturing in about 100 days. Grows upright with heavy foliage, pods cluster at the base, are small but well filled with nuts of sweet fine flavor.

Pkt. (12 to 20 nuts), 5c; 3 pks., 12c; 6 pkts., 20c.

Selected Mammoth
Makes come away just bushes about 18 inches high with heavy erect stalks and large leaves. It produces great quantities of giant nuts, growing to an astonishing size and does well in northern gardens, maturing in about 118 days on light sandy soil.

Pkt. (7 to 12 Mammoth Nuts), 5c; 3 pks., 12c; 6 pkts., 20c.

Herb Seed
These marked * are perennial and when once obtained in the garden may be preserved for years.

Anise. Seeds aromatic.
*Palm. Has medicinal qualities.
Caraway. Seeds aromatic.
Coriander. Seeds aromatic.
Dill. Seeds aromatic.
*Eucalyptus. Medicinal qualities.
Lavender. Very fragrant.
*Rosemary. Very fragrant.
Summer Savory. For seasoning.
Sage. Culinary herb.
Thyme. For seasoning.

Price, pkt. (about 100 seeds), 5c; 3 pks., 12c; 6 pkts., 20c; oz., 15c.
Tomatoes

Leaflet, "How to Grow Tomatoes" free with order if asked for.

The Burbank

This New Early Tomato, THE BURBANK, is one of LUTHER BURBANK'S latest creations. This is what he says of it: "It is by far the earliest and smoothest, and as such a compact grower that it may be planted from one-third to one-fourth closer than usual, thus making it also the most productive Tomato in the world. The fruit is bright crimson red, thick, solid, heavy, medium to large in size, of superior quality and is borne continuously. The BURBANK has one other unique and most remarkable quality which will be appreciated by those who like fresh sliced tomatoes for the table, that the skin peels more freely than any other from the rich, firm flesh." The photograph shows a plant trained on a low trellis and given an idea of its enormous productivity.

Pkt. (100 to 150 seeds), 6c; 3 pkts., 25c; 12c; 6 pkts., 60c; 20c.

Quick Crop

I introduced this Early Tomato several years ago, and have received nothing but praise for it from everyone in every section where it has been grown. It is a strong grower and a great producer. It is handsome in shape, of a beautiful dark red color, very smooth, thick from stem to blossom and end from cracks and ridges, and very solid and heavy. The fruits are produced in large clusters ripening from early Summer until killed by frost. The vines are very hard making it desirable for early planting and it deserves a place in every garden. Ready in 60 to 70 days.

Pkt. (about 300 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; ½ oz., 25c; oz., 40c.

Bonny Best

A splendid large, second early, red Tomato. A vigorous grower and a heavy cropper. It sets its fruit in clusters of 5 or more, and is ready to pick in about 95 days. The shape is perfect and remarkably uniform in size. A great variety for forcing under glass.

Pkt. (about 300 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 30c.

Chalk's Early Jewel

This is a popular second early, bright red Tomato, and within a week or 10 days as early as the crosses "Earliana," and even a heavier cropper. The fruits are of a larger size and of a sweeter flavor, and the plant a stronger grower. The large hands some fruits are very solid, deep through, ripening up to 1 lb. from without any cracks or green core. Skin thin, but strong enough to make it a good shipper and a grand variety for the home garden. Ready to pick in about 125 days.

Pkt. (about 300 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 30c.

Mills Early July

I have made quite a specialty of this early Tomato for several years. Its great value lies not only in the time of ripening its first fruit, but that such a quantity of fruit can be picked from a single plant, while many other varieties ripen only a few fruits at a time. The fruit is of good size, bright red in color, solid, and of fine quality. Ready in about 95 days.

Pkt. (about 300 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 30c.

Home Tomato

This interesting Tomato is quite distinct, and was only recently introduced. 300 Tomatoes were counted on one plant. The fruit is nearly round in shape, small, smooth, solid, and heavy, and extremely productive. It is quite a novelty and just the Tomato for the home garden where it can be treilled to save space.

Pkt. (about 100 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c.

June Pink

This is a pink Tomato resembling "Earliana" in every way except the color. The vine is compact and branches freely producing handsome, good sized, deep pink fruit hanging in clusters. Fruit begins to ripen in about 60 days and bears for a long season.

Pkt. (about 300 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 30c.

Improved Extra Early Tree Tomato

This Dwarf Tree Tomato is very popular on account of its stiff, vigorous, upright growth, with fruit well above the ground. The color of the fruit is a purplish pink and is always round and smooth, being a valuable sort for home garden. It is a very productive variety, both plants and fruit, and begins to ripen in about 95 days.

Pkt. (about 100 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 30c.

Golden Queen

The best yellow Tomato, the handsome fruits are of good size and very smooth, solid, and mealy, and of mild flavor. On account of being a bright yellow color makes an attractive dish when served together with red fruited tomatoes. It is medium early in ripening and a prolific bearer, beginning to ripen in 95 to 100 days. Many consider this yellow Tomato better flavored than red varieties, as it is claimed to be less acid.

Pkt. (about 300 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 30c.

Mills Giant Climbing or Mammoth Prize

I have made this Mammoth Tomato a specialty for years and it has given great satisfaction wherever grown. It possesses every good quality to be found in a Tomato. Vines grow strong and vigorous and when properly trained will attain the height of 12 to 15 feet, and carry an enormous weight of fruit. Its massive fruits are almost perfect in form, and as to size, weight, and solidity no other mammoth tomato I know of can approach it. I have seen specimens weighing 3½ pounds and it is nothing uncommon for fruits to weigh 1, 2, and 3 pounds each. See photograph. Every garden should have a few of these Tomato plants. Begin to ripen in about 110 days.

Pkt. (106 to 150 seeds), 6c; 3 pkts., 12c; 6 pkts., 20c.

Earliana Tomatoes.

Earliana A very popular, extreme- ly early, red Tomato, of good size and quite smooth, also known as Sparks' Earliana. It is very popular with many growers of Tomatoes for early fruits. Plants are of compact growth with stout-jointed branches and yields well, the plants being crowded with clusters of fruit all over. Fruit is bright red in color, solid and of fine quality. Ready to pick in 85 to 90 days.

Pkt. (about 300 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c; oz., 30c.

Golden Queen Tomatoes.
Matchless

The Best Large-fruited Tomato for Main Crop.
This is one of the best second early, large fruited, smooth, main crop Tomatoes in cultivation. It is a strong, vigorous grower, making early vines which produce an abundance of tomatoes throughout the season. Many market gardeners depend on Matchless for main crop. The fruit is large, solid, and meaty, bright carmine red in color, of excellent flavor, containing few seeds, and is a splendid keeper. In many sections the strong vines are inclined to overbear, and it is a standard sort for market gardeners, canners, and the home garden. Ready for market in 110 to 120 days. Pkt. (about 200 seeds), 4c; 2 pts., 10c; 6 pkts., 15c; oz., 25e; lb., 25c.

Pear Tomato

This is a handsome pear-shaped variety used for making Tomato Pies or preserving. The fruit is bright red in color, small and pear-shaped, about the size of a plum. The flesh is tender, of good flavor and ripens in about 90 days. Pkt. about 200 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c.

Improved Golden Husk Tomato

This is a very desirable Tomato, producing fruit in great quantities, which can be used for preserving, pies, etc. The fruit is a handsome yellow color about 1 1/2 inches in diameter and will keep until midwinter. The flavor suggests the strawberry and it is of easy culture doing well most anywhere. The fruit is produced in clusters and the plant should be cared for as other Tomatoes. Ready to use in about 120 days. Pkt. (about 200 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c.

Ponderosa

This variety is very popular in many sections of the country. The vines are of strong growth and produce large clusters of beautiful Tomatoes. Fruit is deep purple in color, of immense size, very meaty and solid with small seeds, and is a good tomat0 for the home garden. Ripens in 110 to 120 days. Pkt. (about 100 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c.

Mammoth Fruited Ground Cherry

This Ground Cherry will grow in almost any soil, and is just as easily raised as a Tomato. It is a very prolific bearer, fruit a handsome purple in color when ripe, and oh! what luscious fruit. For sauce or pies they are excellent and they also make good preserves, and dried in sugar are pronounced by many equal to raspberry. The plants grow to about 2 1/2 feet high and should be planted and cared for like Tomatoes. Ready to use in about 120 days. Cooking recipe on every packet. Pkt. (100 to 150 seeds), 5c; 3 pkts., 12c; 6 pkts., 25c.

Orange Sunberry

This new Sunberry is claimed to be an improvement on anything in the Sunberry class, and was only recently introduced by Luther Burbank, from whom my supply of seed comes. It resembles the black Sunberry, though even more productive and the berries grow in larger clusters, but above all the berries ripen nearly a month earlier. The color of the berries is a beautiful orange and the productivity of the fruit will appeal to everyone. Give it a trial this year and report how you like it. Pkt. (50 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

Albino or White Tomato

At last we have a new white variety that is a beauty, contains no acid and so will make tomatoes as attractive to thousands of people who have heretofore avoided them on account of the acidity. The fruit is ivory-white in color and grows to a good size, firm and solid having very few seeds making the seed rather high in price. The plants grow strong and robust and bear fruits for a long time in clusters of 3 to 5. This is a real novelty and the best white tomato ever offered. Ripens early. Pkt. (about 50 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

Red Grape Tomato

The fruit is about the size of a large grape or cherry and is produced in clusters of 10 to 15 or more. They are very large in color and perfectly smooth, whole clusters ripening at one time. These small Tomatoes are very useful for serving whole in salads, also for pickles and preserves. The vines grow very vigorously and produce an immense quantity of fruit throughout the season. Fine for the home garden. Pkt. (about 100 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c.

Garden Berry

This is a very attractive fruit, easily raised from seed in three or four months from the time seed is planted. Plants grow strong and erect, 2 to 3 feet high, producing fruit in clusters about one-half inch in diameter of a shining black color. It makes good pie, preserves and jams, but should not be picked until thoroughly ripe. The above photograph was sent me by a customer, who writes: "We picked ripe berries from August until late in October. The bushes were in full bloom and loaded with green berries when killed by frost."

Another customer writes: "My Garden Berry was especially fine, each plant averaged 3½ quarts of fruit." While another customer in color as: "the bush is covered with green berries. Every plant was loaded with berries, which make bunch in price. You should not fail to grow garden berry. Pkt. (50 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

ALL KINDS OF TOMATOES IN MIXTURE

This mixture is made up of all the different varieties of Tomatoes I offer as well as several others not in my list. From the very earliest to the latest sorts of the different colors, shapes and sizes will be produced. A very interesting collection and should prove a real curiosity, maturing ripe fruits from about 85 to 120 days. Pkt. (about 300 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c.
**Turnips**

**Early Snowball or Six Weeks**

A pure white variety, bulbs having a smooth, white skin and are nearly round. Is very tender and sweet. One of the best turnips to sow in the late spring. Matures in about 60 days.

Pkt. (about 1,000 seeds), 4c; 3 pkts., 12c; 6 pkts., 15c; oz., 25c; ½ lb., 35c.

**Early Purple Top Strap-Leaf**

Roots of quite flat, flesh is very fine grained, sweet and tender. It is a quick grower; planted large for table use. Will form good sized roots in about 56 days.

Pkt. (about 2000 seeds), 4c; 3 pkts., 12c; 6 pkts., 15c; oz., 25c; ½ lb., 35c.

**White Egg**

Popular early turnip, growing to a good size. The roots are even shaped, smooth, and pure white. The flesh is fine grained and mild, sweet flavor. Does well for early spring sowing but is grown quite extensively for fall use. Ready for use in about 55 days.

Pkt. (about 2000 seeds), 4c; 3 pkts., 12c; 6 pkts., 15c; oz., 25c; ½ lb., 35c.

**Turnip Mixture**

A grand mixture of all turnips. I have made up a great mixture of garden turnips and rutabagas including both white and yellow-flavored varieties. It is a wonderful collection and will mature roots all the way from 45 to 100 days. You should try it.

Pkt. (about 2000 seeds), 4c; 3 pkts., 12c; 6 pkts., 15c; oz., 25c; ½ lb., 35c.

**Rutabagas**

**Heavy Cropping**

One of the most profitable of all yellow Rutabagas. It is the best shaped heaviest, hardest, and most productive. The flesh is a beautiful yellow color, fine grained and sweet. Excellent for table use or for stock feeding. Ready in about 90 days.

Pkt. (about 2000 seeds), 4c; 3 pkts., 12c; 6 pkts., 15c; oz., 25c; ½ lb., 35c.

**Improved American Purple Top**

A very productive sort. Produces large, smooth, globe-shaped roots with purple top, yellow skin and flesh. Being fine grained and very sweet. Matures in about 90 days.

Pkt. (about 2000 seeds), 4c; 3 pkts., 12c; 6 pkts., 15c; oz., 25c; ½ lb., 35c.

**Giant White Sweet**

An extra good white Rutabaga, growing to a large size, and is most excellent for table use or for stock. The flesh is white, firm, rich, crisp, and sweet. Just the Rutabaga for a big yield. Matures in 90 days.

Pkt. (about 2000 seeds), 4c; 3 pkts., 12c; 6 pkts., 15c; oz., 25c; ½ lb., 35c.

**Salsify or Vegetable Oyster**

MAMMOTH SANDWICH ISLAND. This is the best variety grown and the largest and most profitable. Salsify in cultivation. The roots are of very superior quality, and delicate in flavor. Sow in spring as the roots require a full season to come to maturity, and as they are hardy may be left in the ground during winter or dug and stored in a cool cellar after cutting off the leaves.

Pkt. (about 2000 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; oz., 35c.

**Rhubarb or Pie Plant**

**GIANT CRIMSON**

The best Rhubarb, stalks are of medium size, good length, beautiful crimson color and the quality is simply superb. The skin is so thin and tender that it is simply superb. The skin is so thin and tender when cooked makes a beautiful crimson sauce.

Rhubarb is a very desirable vegetable from the ground in Spring and plants may be raised easily from seed with colors, shape, size, and quality, often 100 to 200 Rhubarbs a plant. In the following Spring when they are to grow, about 3 feet apart. I do not offer roots.

Pkt. (about 150 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c.

**Hybridized Potato Seed**

**Potato Seed Balls.** One-half natural size. It is from these that all valuable new varieties of Potatoes are produced.

**Ground Almond or Chufa**

Have a fine flavor resembling the Coconut or Almond. The nuts grow close to the surface on strong plants, and yield great quantities. The meat is snow white covered with a thin shell or skin of brown color. If planted in early Spring a big crop of nuts may be expected in the Fall. In the South they are much planted for feeding of hogs and poultry.

Pkt. (over 50 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.
Beautify Your Home With Mills Flowers

**Aster.** See inside back cover. 14 varieties in colors.

**Sweet Peas.** See outside back cover for 14 colors. See page 31 for Giant Flowering gorgeous mixture sweet peas.

**Gladiolus Bulbs.** See inside front cover—Rainbow Collection of Gladiolus.

**Alyssum**
Little Gem (Carpet of Snow). Very dwarf, each plant covering a circle of 5 or 6 inches, solid mass of white all Summer.
Fine for edging.
Pkt. (200 seeds), 4c; 2 pkts., 10c; 6 pkts., 18c.

**Balsam**
(Lady Slipper). One of the showiest of annuals, easy to grow. Plants grow 15 to 24 inches high, producing an abundance of flower sprays.
Mixed colors, pkt. (75 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c.

**Bellis**
(Double Daisy). Bloom very early in Spring; fine for beds or borders. Do well in cool shady places.
Mixed Colors, pkt. (100 seeds), 4c; 3 pkts., 10c; 6 pkts., 18c.

**Mignonette**
No garden is complete without a small bed of Mignonette. It is one of the most delicately scented of all flowers. Plants grow rapidly from seed sown in the open ground in Spring; from 12 to 15 inches high and produce long blossom spikes in great abundance.
Special Mixture, all varieties, pkt. (500 seeds), 4c; 3 pkts., 10c; 6 pkts., 18c.

**Colchus**
These showy plants are grown for their brilliancy of foliage. Start seed early indoors, set out young plants after frost.
Mixed Colors, pkt. (100 seeds), 6c; 3 pkts., 10c; 6 pkts., 18c.

**Calliopsis**
These are half-hardy annuals of quick growth, producing a profusion of bright-colored flowers all Summer if planted early in Spring.
SPECIAL MIXED. All sorts and colors. Pkt. (400 seeds), 4c; 3 pkts., 10c; 6 pkts., 18c.

**Cosmos**
Giant Early Flowering. This new strain is very early, blooms profusely, flowers being much larger than other early flowering Cosmos.
Mixed colors, pkt. (150 seeds), 4c; 3 pkts., 10c; 6 pkts., 18c.

**Candytuft**
GIANT HYACINTH-FLOWERED. One of the most useful hardy annuals. Most desirable for cut flower purposes on account of the immense white flower heads on upright stalks as shown by the illustration.
Pkt. (300 seeds), 4c; 2 pkts., 10c; 6 pkts., 18c.

**Centauria**
IMPERIALIS. The plants grow about 2 feet high with numerous large flowers borne on long stems, and produce a great mass of bloom all Summer. (See Illustration).
Mixed, pkt. (150 seeds), 4c; 3 pkts., 10c; 6 pkts., 18c.
Grass Pinks Sometimes called "June Pinks," are low growing, hardy Pinks. Bloom early, unequaled for the border of beds, walks or drives. Do well in any good garden soil with full sun and in an open place.

SINGLE AND DOUBLE VARIETIES. Mixed. Pkt. (100 seeds), 5c; 2 pkt., 10c; 10 pks., 25c.

Early Flowering Marguerite Carnation The flowering Marguerite Carnation is a grand strain, producing flowers in about 4 months from seed. They are quite hardy, flowering the first season until late in the Fall. Plants grow strong producing a great abundance of fragrant double flowers in a variety of colors such as pink, white, scarlet, purple, red, banded, variegated, striped, etc. Seeds sown during the Summer will produce plants which can be potted in the Fall and will produce an abundance of bloom throughout the Winter.

Mixed Colors. pkt. (100 seeds), 6c; 3 pks., 15c; 6 pks., 25c.

Larkspur GIANT. This is a well known annual of great beauty producing large double flowers of various colors, shades, and markings which are borne on long spikes like immense Hyacinths. Easily grown.

Mixed Colors. pkt. (300 seeds), 4c; 2 pks., 8c; 10 pks., 15c.

Sweet William A very attractive hardy perennial growing from 12 to 18 inches high. Very effective in beds and borders.

DOUBLE MIXED. All colors. Pkt. (200 seeds), 3c; 3 pks., 9c; 6 pks., 15c.

Digitalis (Foxglove). Produces long spikes of richly colored flowers, very ornamental, often 3 to 4 feet long.

Mixed Colors. pkt. (300 seeds), 4c; 3 pks., 10c; 6 pks., 15c.

Ricinus - Castor Oil Bean ZANZIBARENSIS. Grown largely for its picturesque foliage, enormous in size. The plants attain a height of 10 to 15 feet, leaves 2 to 4 feet across.

Pkt. (15 large seeds), 3c; 3 pks., 9c; 6 pks., 15c.

Smilax A popular and desirable window vine, on account of its charming glossy green and graceful foliage. Greatly prized for bouquets and decorating. Soak the seed in water 24 hours before planting.

Pkt. (100 seeds), 5c; 3 pks., 12c; 6 pks., 25c.

Early Garden Pinks These new Pinks bloom the first Summer from Spring sown seed. They flower in great profusion giving a great array of fine colors from white through the different shades of pink, crimson, and variegated. Some are double, others single but all have that rich fragrance so prized in the Garden Pinks. The plants are of dwarf and compact habit often producing 60 to 100 blooms on a single plant.

Mixed Colors. pkt. (200 seeds), 4c; 3 pks., 10c; 6 pks., 15c.

Blue Lace Flower A new and most beautiful flower from Australia. The lovely umbrella shaped flowers are composed of a large number of florets, and its color is the most beautiful imaginable, a clear heavenly blue—a rare and beautiful shade. While so beautiful in shade and color it is of the easiest culture, and seed sown out-of-doors after frost will bloom from July until October. It also thrives inside as a pot plant and will furnish flowers for a long period. I know of no annual that will give more pleasure than this beautiful flower with its dainty lace-like bloom.

Pkt. (100 seeds), 5c; 3 pks., 12c; 6 pks., 25c.

Eschscholtzia (California Poppy) The California Poppy is a showy, quick growing free-flowering annual, of low, spreading growth, blooming throughout the season. Nothing can excel it in brightness. Sow the seed early in the Spring where the plants are to bloom and it will be found a bed or border will be very attractive in the many gorgeous colors.

Mixed Colors. pkt. (500 seeds), 4c; 3 pks., 10c; 6 pks., 15c.

Hollyhocks Annual Everblooming. There are as easily grown from seed as any annual and commence blooming in about 12 weeks, and continue throughout the season. This is a wonderful free-flowering sort and produces large flowers in many beautiful colors. I offer a special collection in mixed colors both single and double.

Pkt. (100 seeds), 5c; 3 pks., 12c; 6 pks., 25c.

All Colors in Dahlias

Dahlias can be grown from seed and will bloom from 3 to 4 months after planting. Seed sown in the house in March or April will produce flowering plants as soon as plants grown from tubers. Some of the finest large Dahlias and richest colors have been found among seedlings, and it is very doubtful if there will be any two alike from a packet of seed.

I have made up a special mixture of both single and double varieties and I am sure if you once grow these beautiful flowers you will become a lover of the Dahlia. Order some of the seed and you will be pleased with the results. Special Mixture Double and Single. Pkt. (100 seeds), 10c; 3 pks., 25c; 6 pks., 40c.
**Godetia**
A charming annual growing about a foot high, flowering all Summer, producing many shades and colors.
Mixed Colors, pkt. (150 seeds), 4c; 3 pkts., 12c; 6 pkts., 18c.

**Large Flowering Ten Weeks Stocks.**

**Stocks**

**LARGE-FLOWERING TEN WEEKS.** This hardy, handsome type of Stocks produces plants from 15 to 18 inches high, and is most suitable for borders or for pot culture. Seed for early flowering plants should be started in the house in February or March. Plants prefer a sunny location and produce immense spikes of handsome flowers of various colors having a delicate fragrance.
Mixed Colors, pkt. (150 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c.

**Mills Giant Nasturtiums**

For Summer display in large or small beds nothing can surpass Nasturtiums. They are of the easiest culture and start to bloom early and keep up a continuous display of bright colored flowers until frost in the Fall. The Dwarf varieties make most beautiful bedding and border plants growing about one foot high. The Tall or Climbing kinds are for covering unsightly places where they can trail up a few feet from the ground.

**DWARF BRILLIANT BEAUTIES.** The plants make a neat lowly rounded bush 8 to 12 inches high producing a wonderful display of flowers of enormous size, in all colors to be found in Nasturtiums, the foliage being very attractive.
Mixed colors, pkt. (100 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; 1 oz., 15c; ½ lb., 40c.

**GIANT CLIMBING.** This is the King of all Giant Nasturtiums and is used up in a wonderful mixture of colors and variations in foliages. It is just the variety to plant by an arbor or fence.
Mixed colors, pkt. (100 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c; 1 oz., 15c; ½ lb., 40c.

**Kochia (Summer Cypress)**

This is an annual plant of very rapid growth, sometimes called "Burning Bush." Makes plants as shown in the illustration about 2 feet high. Leaves slender, of light pea green until Fall, then changing to blood red and carmine. Fine for temporary hedge, border or dividing line.
Pkt. (500 seeds), 4c; 3 pkts., 12c; 6 pkts., 15c.

**Four O’Clock - Marvel of Peru**

The flowers have the strange habit of remaining closed until about 4 o’clock in the afternoon, when they all open, becoming a bank of vivid coloring filling the air with a delightful fragrance. Grows about 2 feet high.
Mixed Colors, pkt. (50 seeds), 4c; 3 pkts., 12c; 6 pkts., 15c.

**Kochia (Summer Cypress)**

**Christmas Cherry**

This is the most showy and interesting plant for garden or house culture. The plant grows about a foot in height, with dark green leaves and an abundance of fruit. It is called by some a Jerusalem Cherry, and at first the fruit is green, then turning to the brightest glossy scarlet when ripe. Now seeds in house early in Spring, transferring the plants to the garden after danger of frost, and by Fall they will be loaded with cherries, and may be gathered and taken into the house, and the fruit will hang on the plants nearly all Winter, which makes a very attractive pot plant.
Pkt. (50 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

**Marigold**

A well known annual, flowering from early Summer far into the frosts of Autumn. I offer the Dwarf and Tall varieties.

**CHRISTMAS CHERRY**

This is a most beautiful and popular annual growing well from seeds in any good garden soil. It blooms freely and continues in bloom from early Summer to late in the Fall. Plant grows 10 to 15 inches high, producing masses of beautiful double flowers of deep orange-yellow color and it is suitable for pot culture for Winter blooming. Do not fail to include this in your list of flowers.
Pkt. (50 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

**Orange Calendula**

This is a most beautiful and popular annual growing well from seeds in any good garden soil. It blooms freely and continues in bloom from early Summer to late in the Fall. Plant grows 10 to 15 inches high, producing masses of beautiful double flowers of deep orange-yellow color and it is suitable for pot culture for Winter blooming. Do not fail to include this in your list of flowers.
Pkt. (50 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

**DWARF FRENCH.** Produces plants from 6 to 8 inches high, single and double mixed colors.
Pkt. (over 150 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c.

**TALL AFRICAN.** Grows about 2 feet high producing large double flowers of beautiful shades and colors.
Mixed colors, pkt. (over 150 seeds), 4c; 3 pkts., 10c; 6 pkts., 15c.
**Mills Giant Pansies**

*are perfect marvels in size and beauty. They produce giant flowers in the most wonderful colors and without doubt represent the highest attainable degree of perfection as regards size and coloring of the flowers; they often measure 2 to 4 inches across, of clear tones of color with wonderful tints and variations such as white with dark center, lavender, dark and light blue, violet, blue-rose, royal purple, rose, red with silver rim, mohogany, yellow, wine colored, red and gold, lavender and gold, striped, margined, pure white, black, etc.

Mixed Colors, pkt. (100 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c.

---

**Phlox (Flame Flower)**

The annual Phlox surpasses almost everything else in dazzling brilliance and is of one of the most popular flowers. They will thrive on any soil if given a sunny location and if seed is sown in early spring they begin to bloom early in summer and will continue until severe frost in the fall. When sown en masse, the coloring is varied and brilliant beyond description.

**LARGE BLOOD RED.** The darkest colored. Pkt. (100 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c.

**PRIMROSE.** Large soft primrose yellow flowers. Pkt. (100 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c.

**ALBA.** Large pure white. Pkt. (100 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c.

---

**Dwarf Phlox**

The dwarf Phlox plants average only 5 or 6 inches high and are covered with bright flowers. Valuable for low beds, edgings, and borders.

Mixed Colors, pkt. (100 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c.

---

**Portulaca**

This charming annual is hard to equal for brilliance and is sometimes called "Sun Plant." It will flourish under almost all conditions though hot sun and light sandy soil suit it best. Through the driest, hottest seasons it blooms amazingly, carpeting the ground with a maze of foliage almost hidden by the abundance of flowers. Nothing is prettier for beds and edgings.

**ROYAL BEAUTY.** All colors, single and double mixed. Pkt. (100 seeds), 5c; 3 pkts., 12c; 6 pkts., 20c.

---

**Mills Gorgeous Poppies**

*Poppies should be in every garden for they are so easily grown. Sow the seed thinly in drills or broadcast early in the Spring where the plants are to stand and barely cover the small seeds from view.*

**Tulip or Glaucum**

As brilliant and showy as the finest Tulip. In massed blood scarlet with jet black center. They begin to bloom very early and continue for a long time. If seed is sown in Fall after September the young plants will endure the Winter and are ready to show their gorgeous blossoms very early in the Spring like Tulips. This is a most showy Poppies. Pkt. (1000 seeds), 4c; 3 pkts., 12c; 6 pkts., 18c.

**Flanders Poppy**

The scarlet Poppy of the Fields of Flanders. Very vivid scarlet red. Official flower of the American Legion. Pkt. (1000 seeds), 4c; 3 pkts., 12c; 6 pkts., 18c.

**Giant Shirley**

One of the most beautiful of all Poppies and produce flowers of enormous size and of the most gorgeous colors. They possess a grace and beauty all their own. Shades of delicate rose, pink, carmine, brilliant crimson, white, scarlet edged with red and many others are blended in this wonderful Poppies. Plants grow about 15 inches high.

**DOUBLE MIXED, Both Single and Double.** Pkt. (over 2000 seeds), 4c; 3 pkts., 12c; 6 pkts., 18c.

**Double Peony-Flowered**

Plants attain a height of about 8 feet and produce double ball-shaped flowers of gigantic size and in the most brilliant colors.

**MIXED COLORS, pkt. (over 2000 seeds), 4c; 3 pkts., 12c; 6 pkts., 18c.

**Brilliant Mixed Poppies**

This is the greatest mixture of Poppies I have ever sent out. There are over 20 named varieties included in the mixture and is sure to make a wonderful display for a long time. Flowers are immense both in size and color, some are single, double, and semi-double, and every color imaginable will be found in a bed of these gorgeous Poppies.

Pkt. (over 2000 seeds), 4c; 3 pkts., 12c; 6 pkts., 18c.

**Perennial Poppies**

There are very attractive on account of the large handsome flowers measuring 6 to 7 inches across of dashing brilliant colors, of red, orange, yellow, and white.

**HILL, pkt. (1000 seeds), 5c; 3 pkts., 12c; 6 pkts., 18c.

**MIXED COLORS, pkt. (over 2000 seeds), 4c; 3 pkts., 12c; 6 pkts., 18c. Double Peony-Flowered Poppies.**
Sweet Peas
(For 14 Colors, See Back Cover)
Giant Flowering Gorgeous Mixture
should be grown by every one of my cus-
tomers. It is a wonderful mixture pro-
ducing giant flowers in all possible color
variations to be found in Sweet Peas. They
will grow anywhere you can raise common
garden peas, and begin to bloom early and
continue for months. To secure beautiful
blossoms manure or fertilize liberally.
Plant early in Spring, give support, and
water freely.
All colors mixed, pkt. (about 100 seeds),
6c; 3 pkts., 15c; 6 pkts., 25c; oz., 50c; 24
lb., 50c.

Petunias—Ruffled Monsters
This strain is not only a very
wide range of colors in most beautiful combina-
tions including pink, red, variegated, white, blue,
and many dark velvety shades. The petals are
waved and frilled, curled and twisted, giving
an extremely pretty flower. This strain is carefully
hand-pollinated and seed is very costly.

PETUNIAS MIXTURE. All colors. Pkt. (50 seeds), 20c; 3 pkts., 50c.

Balcony Petunias
For window or porch boxes,
terraces, etc., the Balcony
Petunia will supply a floral effect throughout the
entire Summer that is sure to be very pleasing.
The colors range through various shades of blue,
white, rose and red.

BALCONY MIXTURE. All colors. Pkt. (250 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

Antirrhinum (Snapdragons)
These are favorites in American gar-
dens because they are one of the most
valuable and decorative flowers which can easily be grown from seed, thriving
in any soil, and blooming freely.
The tall sorts are the most desirable for
cut flowers while the dwarf make the
best plants for beds or edging.

LARGE FLOWER. DWARF
Mixed Colors, pkt. (300 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

LARGE FLOWER. TALL
Mixed Colors, pkt. (200 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

Wild Flower Garden Mixture
This mixture contains al-
most every imaginable
type of Annual Flower, and is useful as an inexpensive way to produce
display along walks, fences or hedges. By sowing a liberal supply
of this seed it is easy to convert any spot into a picture garden.

Every day during the flowering season furnishes new surprises in the way
of flowers in all sizes and colors.
Pkt. (3000 seeds), 5c; 3 pkts., 15c; 6 pkts., 20c; oz., 50c.

Ornamental Cotton
This is a very in-
teresting plant to grow,
especially in the North. It is quite ornamental and a few
plants in the garden will attract special atten-
tion when the great coton balls open.

Easily grown from seed.
Pkt. (50 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

Sunflower
GLOBE OF GOLD
A bushy plant grow-
ing from 3 to 4 feet
high, producing beau-
tiful flowers of purest
golden yellow borne on
long stems above the
green foliage.

Does well most any-where.
Handsome in the garden or cornfield of lawn.
Pkt. (50 seeds) 5c; 3 pkts., 12c; 6 pkts., 20c.

For Gladiolus Bulbs
See Inside Front Cover

Everlasting Flowers—Helichrysum
The plants grow 2 to 3 feet high and are
coversed with large double flowers of the most
brilliant colors, including white, pink, yellow,
and scarlet. Very attractive for bonnets and
when dried will keep for years as cut flowers.
Mixed Colors, pkt. (200 seeds), 6c; 3 pkts.,
15c; 6 pkts., 25c.

Petunias
For garden or house culture few plants equal Petunias for
effectiveness. They grow readily from seed and are especially
useful for borders, small beds, window boxes, porch boxes, and

daisies.

Dwarf Petunias
This is a very attractive Petunia, grows bushy and compact
and the medium-sized flowers are produced in great abundance everywhere throughout the entire Summer and Fall, and are of the most pleasing clear pink with a silvery white throat. A splendid plant for pots and beds.
Pkt. (200 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

Rosy Morn Petunia
These plants bloom so early and so freely, sometimes 100 on a single plant.
Pkt. (200 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

Star Petunia
For window or porch boxes,
terraces, etc., the Balcony
Petunia will supply a floral effect throughout the
entire Summer that is sure to be very pleasing.
The colors range through various shades of blue,
white, rose and red.

BALCONY MIXTURE. All colors. Pkt. (200 seeds), 5c; 3 pkts., 15c; 6 pkts., 25c.

Infantum (Snapdragons)
These are favorites in American gar-
dens because they are one of the most
valuable and decorative flowers which can easily be grown from seed, thriving
in any soil, and blooming freely.
The tall sorts are the most desirable for
cut flowers while the dwarf make the
best plants for beds or edging.

LARGE FLOWER. DWARF
Mixed Colors, pkt. (300 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

LARGE FLOWER. TALL
Mixed Colors, pkt. (200 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

Baby Rose - Roses From Seed

The Smallest Ever Grown. With seed of these Roses, plants may be had in bloom in 60 to 90 days. Flowers appear in large clusters, perfectly hardy in the garden, in pots they bloom both Summer and Winter. Packet of seed will produce Roses of various colors, hardly any two alike. Mrs. John Dady, a New York customer writes: "This is the first time I ever tried the Baby Rose seed. I planted them May 10th and 30 came up from one packet. One plant has two clusters and one plant has a tiny pink rose that opened this morning, July 12th."

Mixed Colors, pkt. (100 seeds), 6c; 1 pkt., 15c; 6 pkts., 25c.

Salvia (Scarlet Sage)

The Salvia is now a standard bedding plant, its long spikes of bright scarlet flowers, borne in great profusion make a great sight until killed by frost. Sow seed in March or April in a hotbed or indoors and set outside after danger of frost.

SPLENDENS. The most popular variety, producing beautiful large bright scarlet flowers. A profuse and long season bloomer. Height 2½ to 3 ft.

Pkt. (100 seeds), 6c; 3 pkts., 15c; 6 pkts., 25c.

Zinnias

These are becoming very attractive for mixed borders and bedding purposes, and are remarkable for the profusion and duration of their flowers. They thrive anywhere but delight in a sunny location and if seed is sown early in the Spring will flower all Summer and Fall until killed by frost. I want to call special attention to the New Giant Dahlia Flowered Zinnias.

Giant Dahlia Flowered

This new Dahlia Zinnia is grown in fourteen distinct shades. While I do not offer these separately I have made them into a special mixture so that all the following shades should be found in a packet of my seeds—light rose, Lythian rose, very rich orange, yellow, bright crimson, brick red, bright scarlet, Spinel red—darker if all the red shades, orange and gold colors, apricot shades, deep lavender, large rose white, deep creamy yellow, primrose. It has all the Dahlia colorings including shades unknown to Zinnias heretofore. They bloom from July until frost.

Mixed Colors, pkt. (over 100 seeds), 5c; 3 pkts., 12c; 6 pkts., 25c.

Pictote Zinnia

Giant Mammoth. Produces huge flowers measuring 5 to 6 inches across and very double. It is wonderful for flower beds, where it is white, rose, crimson, yellow, purple, salmon, and various other colors and combinations almost impossible to describe.

Mixed Colors, pkt. (about 100 seeds), 5c; 3 pkts., 12c; 6 pkts., 25c.

Moonflower

A beautiful annual rapid climber, foliage very dense, the flowers being produced in a wide range of delicate colorings. Many of the sorts open only when the sun rises, others when the sun sets. I offer all different varieties in a special mixture. Seeds should be soaked in warm water for 24 hours before sowing to assist rapid germination. Try my mixture of Moonflowers this year.

Pkt. (20 seeds), 5c; 3 pkts., 12c; 6 pkts., 25c.

Chinese Sponge

This is a very ornamental and useful vine for a porch or trellis, and comes from the garden family. It is a strong and rapid grower and produces a great quantity of fruits from one to two feet long of an attractive shape and color. Inside the shell of matured fruits there is a sponge-like substance and when taken out and bleached, it is porous and tough, making a good substitute for sponges or dish cloths, besides being useful for various articles of fancy work. It has been in flower and fruit in many good garden soil and the fruits will mature in from 90 to 100 days.

Pkt. (20 seeds), 5c; 3 pkts., 12c; 6 pkts., 25c.

Chinese Sponge

Japanese Kudzu Vine

Jack-and-the-Beanstalk Vine

A most remarkable climber from Japan. It is perfectly hardy and with ordinary treatment will grow 80 to 90 feet in one season from well established roots, filling the air with fragrance from its large clusters of purple wisteria-like blossoms. The foliage is large, shaped like the leaf of a bean, starts into growth slowly but after three or four weeks grows almost beyond belief. Fine for porches, arbors, old trees, etc.

Pkt. (50 seeds), 5c; 3 pkts., 12c; 6 pkts., 25c.

Japanese Morning Glory

Flowers are of zinniate plaza, the colorings and markings ranging from snow-white to black-purple with all the possible intermediate shades such as fiery red, pink, rose, red, carmine, copper, crimson, deep blue, pale blue, royal purple, maroon, indigo, bronze, slate, brown, and cherry, while many have throats spotted, marbled, striped, and splashed. Mixed colors.

Pkt. (100 seeds), 5c; 3 pkts., 12c; 6 pkts., 25c.

Salvia or Scarlet Sage.
Beautify Your Home With Asters

Asters are very popular and acknowledged to be the Queen of Autumn annuals. They are easily raised from seed and make a most brilliant show when grown in rows or masses, furnishing a constant supply of cut flowers until killed by frost. The varieties shown on this page represent the most beautiful, artistic and robust types of the wonderful Aster family.

Please remember, as these are all different types of asters you can have "THE WORLD'S GREATEST COLLECTION" of these popular flowers if you order one of my Special Offers, 11 packets for 60c.

SPECIAL OFFER. In order that all my customers may have this wonderful collection of Asters, I will send one packet of each color, 11 packets in all, as described on this page to any address for 60c, postpaid.

LEAFLET: "How to Grow the Most Beautiful Asters" sent Free with every order.

F. B. MILLS, Seed Grower, Rose Hill, N.Y.
King Edward

The flowers are waved and crinkled, of a rich sun-proof crimson scarlet. The best of its particular type, attracts attention wherever grown.

Pkt. (30 seeds), 10c; 3 pkts., 25c.

Blanche Ferry

A beautiful rosette of soft pink, standard with white, striped and tinted with rose pink. A very early and beautiful variety.

Pkt. (30 seeds), 10c; 3 pkts., 25c.

Helen Lewis

A distinct variety. Pkt. a large, intense, rich orange-crimson standard and rose-orange wings. One of the most beautiful blossoms in the list.

Pkt. (30 seeds), 10c; 3 pkts., 25c.

Lavender George Herbert

Margaret Hunt.

A soft shade of blue-purple. Strong and vigorous in habit and blooms profusely. A very beautiful sort.

Pkt. (30 seeds), 10c; 3 pkts., 25c.

Asta Ohn

A soft lavender or cerise shaded with salmon and fuschia. A very beautiful sort.

Pkt. (30 seeds), 10c; 3 pkts., 25c.

Dobbies Cream

A very popular. A distinct pink and white, fine, large pointed and deep cream, strong grower and profuse bloomer, with large, wavy fully expanded flowers.

Pkt. (30 seeds), 10c; 3 pkts., 25c.

Countess Spencer

Flowers extremely large, beautifully waved and tinted with rose-tinted orange. A wonderful bloom, with a large, vividly colored blossom.

Pkt. (30 seeds), 10c; 3 pkts., 25c.

Lord Nelson

A variety destined to become very popular. It is of a rich deep-mauve shade that holds its color. One of the very best in this shade.

Pkt. (30 seeds), 10c; 3 pkts., 25c.

Margaret Atlee

A rich, glowing deep rose pink on a cream background, suffused with salmon and lighter. Flowers excessively waved and of immense size on long, stout stems.

Pkt. (30 seeds), 10c; 3 pkts., 25c.

Mrs. Townsend

A large, well-shaped, freely produced, four-petaled flower, resembling a true scarlet. A strong grower, and freely produces four-petaled flowers.

Pkt. (30 seeds), 10c; 3 pkts., 25c.

Etta Dyke

A very strong grower. Pkt. blooms profusely, flowers large, wavy and of pure white color. One of the best, white, and an easy to please every customer.

Pkt. (30 seeds), 10c; 3 pkts., 25c.

Elfrida Pearson

Flowers very large in the early stages, and bloom profusely. A lovely soft pink, which closely resembles a lovely soft pink. Very beautiful.

Pkt. (30 seeds), 10c; 3 pkts., 25c.

BEAUTIFUL SWEET PEAS

It is easy to grow Sweet Peas because seed can be sown very early in Spring in the open ground, and soon spring into radiant life, producing great quantities of beautiful flowers, which fairly dance and sparkle in the sunlight.

I have selected 14 named varieties of the Giant Butterfly or Spencer Sweet Peas, the most beautiful and easily grown and free blooming sorts as shown and described on this page. The blossoms are beautiful in shape, size and color, very fragrant and are produced in great abundance.

Everybody loves Sweet Peas and should grow them. It takes very little room and they require so little care to get wonderful results. Read the description of each of the 14 varieties and I am sure you will want to grow every one of them. I have made a special offer of the entire 14 kinds for 60c.

SPECIAL OFFER. In order that all my customers may grow this wonderful collection of 14 GIANT SWEET PEAS, I will send one packet of each color, 14 packets in all as described on this page to any address, postpaid, for $1.00; two collections for $1.68.

Leaflet, "How to grow beautiful Sweet Peas" sent free with every order.
